

IAESTE

The International Association for the Exchange of Students for Technical Experience

Annual Review 2011

The International Association for the Exchange of Students for Technical Experience

An independent non-governmental organisation (NGO), with 88 Members and Co-operating Institutions in operational relations with UNESCO. The IAESTE name and logo are the registered properties of IAESTE, the International Association for the Exchange of Students for Technical Experience.

Founded in 1948 on the initiative of James Newby (1893 – 1978)

Established in 2005 as a registered, non-profit making Association.

welcome

Goran Radnović
General Secretary

Dear Friends and Supporters of IAESTE

I am glad to welcome you to the IAESTE Annual Review for 2011.

It is clear in today's globalised world that companies aren't hiring many people with only good academic qualifications. Instead, they tend to recruit global-minded, multilingual young persons with international experience. To say the least, IAESTE experience is becoming an essential boost in many job interviews. That is undoubtedly because this experience is significant for facing challenges and solving hard problems more productively. Ability to live and work in another country helps students realize different ways of thinking and reasoning, and those prove to be crucial in helping them think on a higher level and achieve better results in all aspects of their lives.

IAESTE is proud to be a global organization that provided such experience to more than 335.000 students since its foundation. We are continuing to do so and trying our best to improve lives of many young people every year.

I am happy to announce that our exchange in 2010 was 4364, an overall increase of over 7% for the first time since 2005. In the past exchange season students from 972 Educational Institutions in 85 countries were given the opportunity to train with 2961 Employers in various fields related to their studies. This Annual Review of IAESTE includes the names of Academic Institutions and Employers who have participated in the exchange. We are grateful for the continued level of support for IAESTE during last year.

Staying connected with colleagues and friends is very important and that is why IAESTE launched an improved Alumni Network in January 2011. This is a place where current and former IAESTE members and friends can work together to build IAESTE's global reputation and give it the recognition it deserves.

Your traineeship with IAESTE had an impact on the rest of your life, from the friendships you made to your professional career. We are proud to have been a part of it, and hope you choose to continue to be a part of IAESTE.

Join IAESTE Alumni Network and stay connected!

Our Organisation

The International Association for the Exchange of Students for Technical Experience (IAESTE A.s.b.l.) is an Association of National Committees representing Academic, Industrial and Student interests. Each National Office is responsible for the administration of the exchange in its own country.

The Association was founded in January 1948 at Imperial College, London, on the initiative of the Imperial College Vacation Work Committee. National Organisations of ten European countries represented at this meeting became Members and Mr. James Newby was elected General Secretary. The geographical coverage was soon to spread to most of Europe and beyond, as new countries were admitted to Membership.

The Association became a registered body according to Luxembourg law at its General Conference 2005 in Cartagena de Indias,

the Food and Agriculture Organisation (FAO), the Organisation of American States (OAS) and the European Union (EU), as well as with other educational non-governmental Organisations.

National Secretariats and Committees make up the Membership of the Association. Each year the Annual Conference brings together the representatives of these bodies to decide issues of general policy and with the IAESTE Co-operating Institutions to carry out the exchange of offers for training. Prior to the conference, each Member and Co-operating Institution collects offers from Employers willing to receive students from abroad for a temporary training and work experience period relevant to the students' areas of study, as a complement to their University or College education. The offering Companies or Institutions are expected to pay students a wage sufficient to cover their cost of living during the actual training period.

The offers of training are exchanged with other Members and Co-operating Institutions mainly on a reciprocal basis. Through their affiliated universities and colleges, Members and Co-operating Institutions select qualified students to meet Employers' requirements as outlined on the training offer. Details of the selected candidates are sent to the Companies for approval.

Participation in the IAESTE exchange is open to bona fide students attending courses at Universities, Institutes of Technology and similar Institutions of Higher Education.

For further information about IAESTE please visit our website www.iaeste.org.

Our exchange is open to bona fide students attending courses at Institutions of Higher Education

Colombia. It is a non-political, independent, non-governmental Organisation, in operational relationship with the United Nations Educational, Scientific and Cultural Organisation (UNESCO) and maintains consultative relationships with the UN Economic and Social Council (ECOSOC), the United Nations Industrial Development Organisation (UNIDO) and the International Labour Office (ILO).

IAESTE is also in contact with the United Nations Economic Council for Africa (ECA),

GENERAL CONFERENCE

The General Conference possesses full power to take formal decisions for the fulfilment of the Aims and approves the budget and regulations of the Association. It is composed of one delegate from each Full Member country. It elects the Board and the General Secretary and meets every year in January.

GENERAL SECRETARY

The General Secretary is elected by the Members to co-ordinate the daily administration of the Association and is a Member of the Board.

BOARD

The Board implements the Association's policy and decisions approved by the General Conference, initiates activities supporting the Association's policy in general and provides strategic direction to the Association. The General Secretary is responsible for the day-to-day management of the Association. It is composed of the General Secretary and four elected members.

NATIONAL COMMITTEE

National Committees represent the Member countries and are composed of persons representing Academic, Industrial and Student interests.

The Mission and aims of IAESTE

MISSION

To operate a high quality practical training exchange programme between Members in order to enhance technical and professional development and to promote international understanding and goodwill amongst students, academic institutions, employers and the wider community.

IAESTE operates irrespective of race, colour, sex or creed.

AIMS

To provide students in Higher Education with technical experience relevant to their studies.

To offer Employers well qualified and motivated trainees.

To be a source of cultural enrichment for trainees and their host communities.

Report of the General Secretary

This report is a summary of the exchange activities between IAESTE Members and Co-operating Institutions during 2010. The details of these exchanges are presented in the 2010 IAESTE Activity Report published in November 2010. The exchange took place between 88 Members and Co-operating Institutions from 85 countries and 15 non-Member countries.

The 2010 IAESTE Activity Report contains the detail on the bilateral exchanges, study fields of trainees sent and received by each Member and Co-operating Institution, the number of participating Employers and Institutions, training periods, age, nationality and gender of the trainees and other useful comparative information. It includes detail on the exchange with non-Member countries. The report also contains a summary of the administrative procedures, reports from Members and Co-operating Institutions on activity as well as the names of the staff handling the exchange and the addresses of the National Secretariats. Readers interested in this report may order a copy from the IAESTE National Secretariat in their own country or from the General Secretary.

was 4364, 291 more than in 2009. This shows over a 7% increase and hopefully this trend will continue during the current year. Almost two third of the Members and Co-operating Institutions managed to increase their number of traineeships to incoming students and this was very encouraging. Several countries made a significant increase in the number of placements offered to incoming students, notably, Argentina, Belgium, Brazil, Czech Republic, F.Y.R. Macedonia, India, Iran, Ukraine and United Kingdom.

EXCHANGE DEVELOPMENT IN 2010

Figure 1 shows the number of trainees sent in 2010 and compares this with previous four years. The total number of trainees exchanged in 2010

REGIONAL EXCHANGE

The number of traineeships filled by students from non-European countries accounted for 38% of the number of students sent, down 1% from 2009. However figures show that there was an increase in the number of students received in South America. Numbers sent and received in North America declined in 2010.

As shown on figure 2 Europe continues to dominate the exchange. Some 61.8% of all trainees were sent from EU and other European countries and 61.8% of all trainees were received in Europe, a decrease from 2009.

PARTICIPATING EMPLOYERS AND EDUCATIONAL INSTITUTIONS

In 2010 there was another decrease in the number of Employers who offered traineeships but an increase in the number of participating Educational Institutions. A total of 2961 Employers received students in 2010. The number of participating Educational Institutions rose to total of 972.

IAESTE would like to acknowledge the continued support of all Employers and Educational Institutions in 2010.

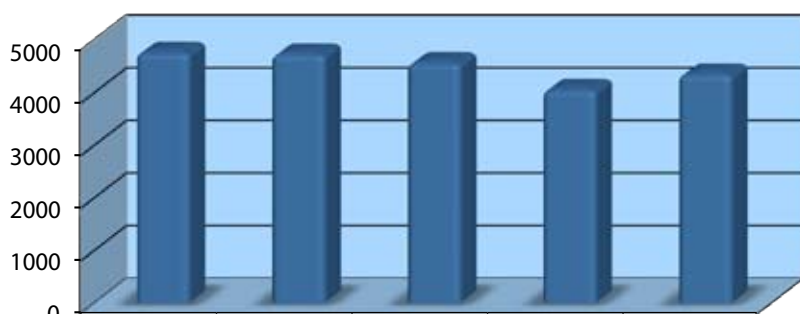

Figure 1. Total Trainees Sent

MULTILATERAL EXCHANGE

The open international exchange is clearly illustrated by the number of Members and Co-operating Institutions that exchange with each other. In 2010 each Member and Co-operating Institution exchanged on average with 17 other Members and Co-operating Institutions, same as in 2009.

Figure 3 shows that 62.7% of IAESTE Members and Co-operating Institutions exchanged with more than 11 countries in 2010. 6 Members sent students to 41 or more countries.

GROWTH OF IAESTE

There is great interest in IAESTE throughout the world and on average 2 new countries per month contact the General Secretary asking for information on how to join the Association. Many contacts are made through our public website www.iaeste.org which has a daily average of almost 1000 visits. Universities or Organisations committed to the Aims of the Association can apply for Co-operating Institution status and each year the Board reviews their progress at their summer meeting. Co-operating Institutions which are no longer conducting an exchange do not have their status renewed. New Co-operating Institutions take 3-5 years to become established and the benefits of this expansion, reflected in the exchange, becomes clear after this period. They are then able to apply for Associate Membership and after a minimum of another 3 years can apply to be Full Members with voting rights. Since 2010, 3 new Co-operating Institutions have been welcomed into the Association: Technical University of Georgia, Georgia; International Crossroads Association, Italy and Qatar University, Qatar. 88 Members and Co-operating Institutions in 85 countries constituted the Membership of IAESTE in January 2011.

RECIPROCITY OF THE EXCHANGE

The IAESTE exchange programme is based on a bilateral balanced exchange between Members. Most Member countries attempt to maintain a balance between outgoing and incoming students but an exact bilateral balance is rarely possible within any given year. Only long-term balance is sought. This flexibility is needed to support the proper allocation of places and the selection of the appropriate students.

In 2010, 36 Members and Co-operating Institutions received more students than they sent abroad and this benefited the rest. In total, 415 work experience places were involved or 9.5% of the total exchange.

It is traditional within IAESTE for Members with a higher Gross National Income per capita (GNI) to receive more trainees than they send. Strict

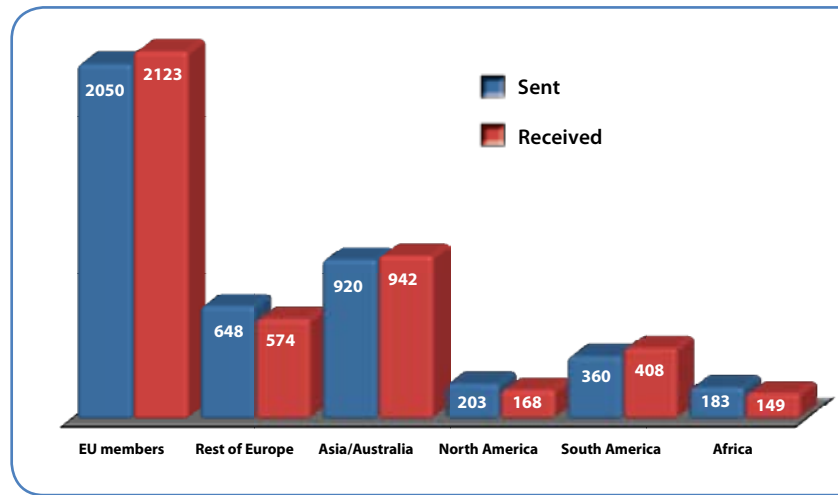

Figure 2. Trainees sent and received by continent

reciprocity is not implemented with new Members in the early years which allow those in developing countries and those from smaller countries to gather support within their country in order to develop the exchange. Countries with a GNI per capita more than 12,000 USD provided 61.3% of these places in 2010, a increase from 2009.

Total number of trainees exchanged shows over a 7% increase compared to last year

PROFILE OF THE STUDENT TRAINEE

Gender balance and Age: Age and gender balance of trainees varies little from year to year but differs appreciably from country to country.

In 2010, 59,6% male students and 40,4% female students participated in the programme. The gender balance relates to cultural and educational traditions in the IAESTE countries.

The age of trainees in 2010 ranged from 20 to 30 years with the majority (71.9%) being between 21 and 23. The average age is just 22.5 years old.

Study fields: In 2010 63.1% of trainees were students of Engineering and Technology. The remaining 37% were divided between the Sciences,

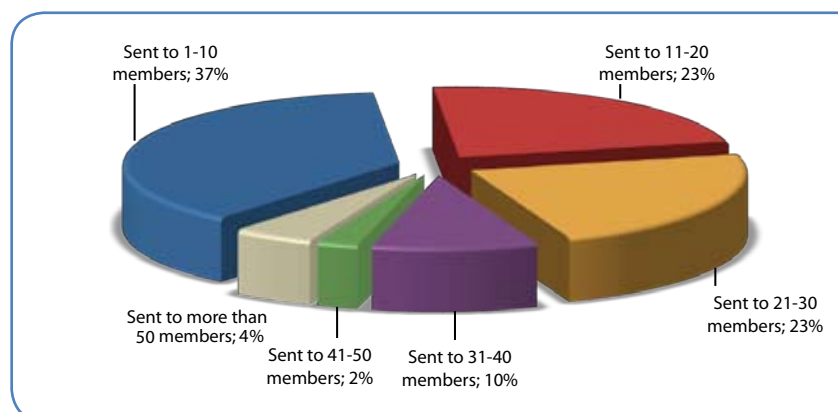

Figure 3. Multilateral Exchange

18%; Architecture and Applied Arts, 11%; Agriculture, 2% and other fields of study, 6%; as shown on Figure 4. Placements in Engineering shows slight decline while there was an increase of 1% in Science placements in 2010.

In 2010 the largest of the Engineering Faculties was Mechanical Engineering 21%, followed by Computer Science 17%, Civil Engineering 13%, Electrical Engineering 10%, Chemical Engineering 8%, Electronic Engineering 5%,

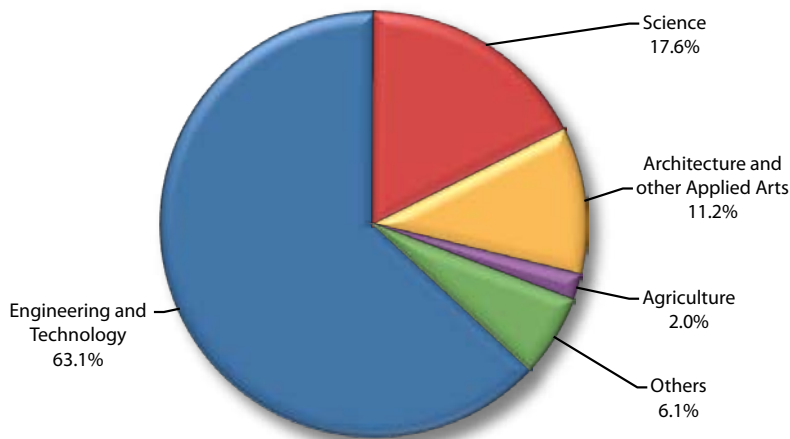

Figure 4. Training Specialities based on Trainees received

Industrial Engineering 3%, Environmental Engineering 3%, Telecommunications 3%, Biotechnology 3%, Aeronautical Engineering 2% and Food Technology 2%. Indeed there was significant increase in the number of Power Engineering, Electronics and Mechanical Engineering placements and Textile Engineering fared better this year but the majority of traditional Engineering placements decreased. Placements in Mathematics,

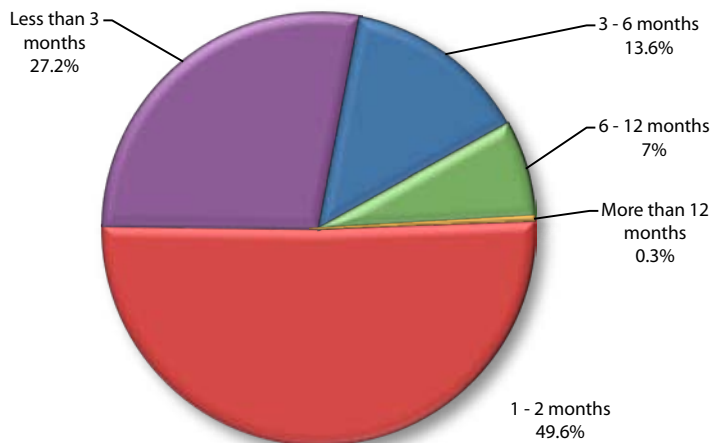

Figure 5. Training Periods

Architectural and Media studies and Biology saw an increase in numbers in 2010.

Sub-dividing the Engineering groups gives us the breakdown between the major participating disciplines as shown on Figure 7.

Figure 8 shows major science disciplines in 2010.

Nationality: The majority of students participating in the IAESTE exchange are citizens of IAESTE Member countries. Some are from non-Member countries and are studying abroad at Educational Institutions co-operating with IAESTE.

In 2010, 193 students with different nationalities to the sending country received places on the programme. Of these 2 were from the non-Member country Netherlands.

Nine IAESTE countries exchanged students directly with non-Members countries that included: Afghanistan, Albania, Algeria, Bulgaria, Cameroon, Cape Verde, Luxembourg, Mauritius, Morocco, Moldova, Nepal, Singapore, Sudan, Togo and Venezuela.

WORK EXPERIENCE POSITIONS ON OFFER IN 2010

Figure 5 indicates the training periods for 2010 with 49.6% of trainees on a 6-8 week placement with 27.2% on placements lasting between 8-12 weeks.

The number of trainees to benefit from long-term placements represents 21.4% of total

There was significant increase in the number of Power Engineering, Electronics and Mechanical Engineering placements

placements in 2010, a slight increase from 2009 can be seen on Figure 6.

Most of the training takes place in the period June to September and coincides with the Northern Hemisphere vacation period. In the Southern Hemisphere, opportunities are available between October and April. 42 Members and Co-operating Institutions are now in a position to offer long term training opportunities while 24 offer training throughout the year.

The majority of the work placements are exchanged during the Annual Conference in January on a bilateral basis but thanks to the development of the IAESTE IntraWeb the exchange can continue after this meeting. New and unused Offers can be put on the IntraWeb at any time by Members and Co-operating Institutions and this ensures that IAESTE can accommodate students and employer Offers as they arise.

Categories of Offers: IAESTE classify placements as Research and Development (D) indicating work of a laboratory nature; Professional (P) is used for professional activities, practical design work and similar; Working environment Offers (W) indicate work in the industrial area relevant for the student's background and category (X) covers non-specific Offers.

The non-specific (X) Offers can be general office jobs, language Offers and similar. In all cases it is the responsibility of the receiving National office making the (X) category Offers to ensure that the working conditions are acceptable, beneficial to the student and in line with the standards expected of all IAESTE Offers.

In 2010 a total of 6290 training places were reported to be available as follows: Research and Development (D) 3257, 51.8%, Professional (P) 2517, 40%, Working Environment (W) 386, 6.1% and Non-specific (X) 130, 2.1%. The percentage of Offers used as reported by the Members and Co-operating Institutions by category of the available Offers were (D) 74.4%, (P) 60.4%, (W) 63.5% and (X) 60.8%.

The bulk of the Offers are in the Research and Development and Professional areas and students favour these training places that are more in line with academic requirements. In many instances such training is a required part of the curriculum. The Working Environment (W) Offers are valued for higher pay and the opportunities they provide to experience working conditions in industry in other countries.

RETURNED OFFERS AND CANCELLATIONS

Based on the figures reported, the number of lost and unused training Offers in 2010 amounted to 2031, 32.2% of the Offers received which is significant improvement comparing to 2009. Employer withdrawals accounted for 15.1% and student withdrawals were 6.6%. This continues to be one of our major problems areas. Despite the efforts made to date to minimise losses the number of training places lost or unused remains unacceptably high.

In 2010 individual figures show that 9 Members and Co-operating Institutions managed to maintain their total losses below 20% which shows that there is room for improvement and these countries are to be congratulated.

IAESTE Members and Co-operating Institutions must continue to make every effort to minimise these losses, particularly the Offers that remain unused. Improvements here would result in the release of additional available places. This should encourage all countries to seek improvements to their existing practices and to examine their

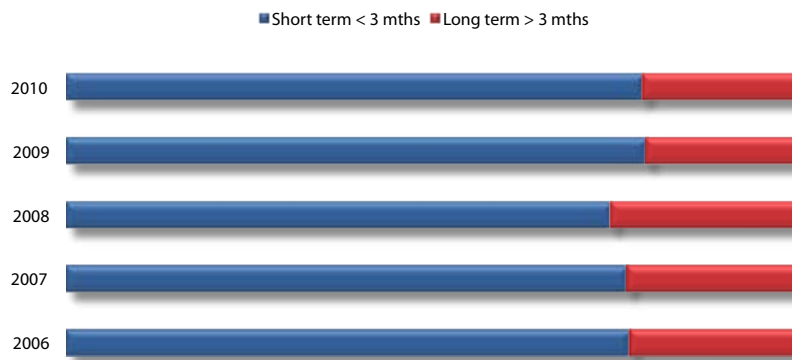

Figure 6. Short Term vs Long Term

communication arrangements. Accurate and timely communications should help reduce student and employer withdrawals and accurate matching of the student skills with those required by the employer would further contribute to minimising the withdrawal of Offers by employers.

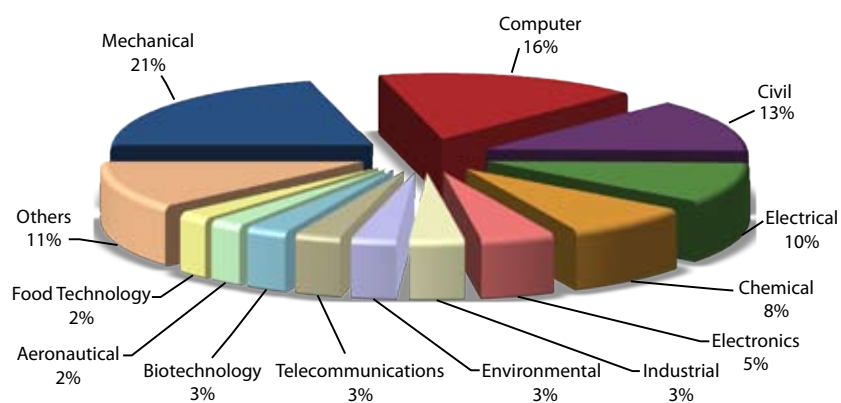

Figure 7. Major Engineering fields

The year round exchange facilitated by the IAESTE IntraWeb now provides the platform for the quick and accurate exchange of jobs between Members and Co-operating Institutions for new and unused Offers and also nominations for these places. This must contribute to the effective use of all Offers both new and unused, as they become available throughout the year.

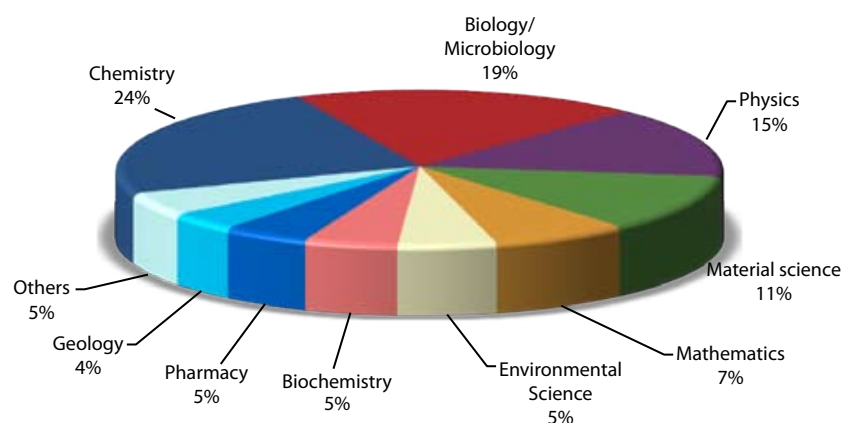

Figure 8. Major Science fields

Annual Conference

The 64th IAESE Annual Conference was held in Bangkok, Thailand from 21 - 28 January 2011 when more than 250 IAESE representatives from 80 countries met to exchange traineeship Offers, hold the General Assembly and enhance collaboration as well as personal relationships between members of the different delegations.

Under the patronage of His Majesty the King Bhumibol Adulyadej, the Opening Ceremony of the 64th Annual Conference of IAESE took place in the Napalai Grand Ballroom of the Dusit Thani Hotel on Saturday, 22 January 2011. Distinguished guests included representatives of the royal family, government officials as well as the Presidents of Thai Universities. The Conference participants were welcomed by Privy Councilor, His Excellency Air Chief Marshal Kamthon Sindhvananda, who presided over the Opening Ceremony.

Professor Dr. Teravuti Boonyasopon, President of King Mongkut's University of Technology North Bangkok, thanked the delegates for allowing him the privilege to act as Honorary Conference President. He extended the warmest welcome to the conference participants on behalf of IAESE

Secretary of IAESE Thailand and all members of the Organising Committee for hosting the Annual Conference in a short notice. He also welcomed new Co-operating Institutions from Georgia, Italy and Qatar as well as observer from National University of Singapore, Mr John Jensen. In his speech, he highlighted achievements of last year's activities and wished everyone an enjoyable stay in Bangkok and a successful Conference.

The ceremony was concluded by Assistant Professor Dr. Tongdee Cheevapruk, National Secretary of IAESE Thailand who also welcomed all delegates and thanked all the sponsors and distinguished guests. The students from Phattayakul School, performed Thai traditional dances which were Queen of Flowers Dance, The Pursuit of Supanna Matcha and Siam Four Regional Dance Under His Majesty the King's Glorious honor.

The Conference was excellently organised by IAESE Thailand. The facilities provided were perfect and allowed for effective exchange of the 6111 Offers of internships. The Plenary Sessions ran smoothly and time was provided for the Introductory Administrative Seminar for new members. During the five day Conference participants were also able to avail themselves of our IntraWeb training, provided by members of the Internet Development Team, a Meet and Greet Session organised by the Mentoring Co-ordinator, Dr Pulat Pulatov, IAESE Tajikistan, enabling newcomers to meet some more experienced

A total of 6111 Offers were successfully exchanged among 80 countries

Thailand. He wished everyone a productive, fruitful and pleasant stay in Thailand.

Mr Goran Radnović, General Secretary of IAESE A.s.b.l. gave warm welcome. He expressed his gratitude to King Mongkut's University of Technology North Bangkok, the National

Report 2011 Bangkok, Thailand

delegates before the start of the Conference. Mini SID was organised by the SID Co-ordinator, Mr Gerhard Gevelmann.

Our brand new online community 'The IAESTE Alumni Network' was successfully launched in time for the Conference. Members and Co-operating Institutions expressed enormous interest and participated in several training sessions organised by Ms Diane Gill, Alumni Relation Manager.

The IAESTE Ombudsman, Professor Bernardo Herold, presented his Report to the Conference. The General Conference acknowledged the excellent job done during his two terms as Ombudsman. The General Secretary presented Professor Herold with a token of appreciation on behalf of all Members.

Ms Riitta Uotila-Kataja was elected to be the IAESTE Ombudsman for the period 2011 - 2014.

Mr Thomas Faltner was elected as Chairperson of the 65th Annual Conference. Mr Daniel Schwarz was elected to the vacant position of IDT Co-ordinator for 2011 and Ms Lucy Everett was elected to the position of SID Co-ordinator for 2011.

As required under the IAESTE Statutes, Mr Pulat Pulatov, National Secretary, IAESTE Tajikistan and Mr Daniel Huppmann, IAESTE Austria retired as Members of the Board, having completed their terms of office. Professor Bernard Baeyens, National Secretary, IAESTE Colombia and Mr Milan Vrućinić, IAESTE Bosnia and Herzegovina were elected for three years and one year respectively.

The General Secretary, Mr Goran Radnović was re-elected by the General Conference to serve a second term as General Secretary for the period 2012 - 2014.

The General Conference acknowledged the excellent job done by Mr Thomas Faltner as Conference Chairperson.

To break up the busy week, fantastic social events were organised. All participants were invited to join the cruise along the Chao Praya River where the Welcome Party was held. The participants dined

on a stylish luxurious cruise. Besides enjoying delicious Thai cuisine guests were able to experience traditional Thai dance performed by IAESTE Thailand alumni. Floating past the historical landmarks gave everyone a chance to experience the beautiful, romantic evening atmosphere in the middle of Bangkok.

The International evening was held at the Hotel on the Monday evening. In addition to the meal

The 65th Annual Conference will be held in Skopje, hosted by IAESTE Macedonia

provided by IAESTE Thailand, national food and drinks from around the world were enjoyed by everyone.

The city tour to Grand Palace, one must-see sight that no visit to Bangkok would be complete without, it's the dazzling, spectacular Grand Palace. After that the participants were taken to a special dinner at Siam Niramit Theatre before enjoying the must see show of Thailand, performed on the gigantic stage now listed in the book of Guinness World Records.

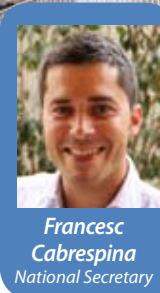

At the end of the week, Mr Pinit Jarusombat, Former Deputy Prime Minister, officially opened the Farewell Dinner in the Hotel's Grand Ballroom.

The General Secretary thanked King Mongkut's University of Technology North Bangkok and IAESTE Thailand for their hospitality and excellent work hosting the Annual Conference.

He also acknowledged the good work done by the outgoing IDT Co-ordinator Ms Katja Prnaver and the outgoing SID Co-ordinator Mr Gerhard Gevelmann.

The 65th Annual Conference of IAESTE will be held in Skopje, hosted by IAESTE F.Y.R. Macedonia from 20 - 27 January 2012.

anniversary

Francesc Cabrespina
National Secretary

IAESTE Spain: now..

First evidence of IAESTE Spain is found in the minutes from a meeting that took place in Madrid on October 11th 1951. At that time, meetings were mainly held in the Foreign Affairs Ministry; it was a time when a few pioneers considered that the present needed to embrace a global future. They were the headmasters of several faculties in Madrid.

Along these first 60 years, Spain has largely contributed to IAESTE with no interruption. It has hosted the Annual Conference three times (Madrid '58, Barcelona '72 and '97), as well as the JUMP and SID in a few occasions. Two of their members have assumed responsibilities in the international board (Dr. Nicolas Klingsberg, 1982-85, and Prof. Joan Mercadé, 1991-94). Spain was also the first member to propose an international alumni

association, the Friends of IAESTE Network then, now the IAESTE Alumni.

Nowadays, IAESTE Spain is constituted by 50 faculties from all over the country, and every year more than 600 students benefit from its international program. It is particularly exceptional that most of the responsibility is directly assumed by volunteer students.

Since its origin until now, 26.000 students have benefited from the exchanges carried out by our committee. Among those students, someone should be mentioned whose training took place in the Netherlands in 1972: Mr. Javier Solana. He was minister in previous Spanish Governments,

...and then

Session for the election of the President

Typical spanish party offered by the Organizing Committee

Visit to the National Institute of Industry

XI IAESTE GENERAL CONFERENCE, MADRID, SPAIN, 1958

Visit to El Escorial

and became High Representative for the Common Foreign and Security Policy of the European Union. And there is no doubt that many others have written success stories which have reflected upon society. Actually, all of those who have ever been connected to IAESTE are the kind of people who get involved with life, people who are eager to know others and enjoy diversity... Following this inspiration, this year IAESTE Spain has launched a project to digitalize and index the records of its whole existence, so as to be in a position to know 'who' we have been and, mainly, 'who' are IAESTE and 'where' IAESTE is now.

If anyone reads these lines in the future, they will probably know that the 60th anniversary of IAESTE Spain took place in an age when global economy was not clearly set, a period in which sustaining IAESTE activities required an additional effort from all those taking part in it.

These years witness how a period of opulence concludes, the moment in which international organizations are refounding themselves to better face a changing society.

We are witnesses of an organization that will most probably outlive us. Nowadays, some organizations can present such a background, but only a few exceptional cases can remain valid to the present in such healthy conditions as IAESTE does.

In relation to this, I would like to express IAESTE Spain's enormous gratitude to all those countries that have ever exchanged with us, to all of those who have eased the way from their position, to all of those who have ever helped to build IAESTE, and specially, much especially, to all those who have ever taken up an active role in IAESTE Spain and are probably not aware of the impact that their action will have on future generations.

"We are witnesses of an organization that will most probably outlive us"

The following interview with Jürg Zahnd highlights some of the benefits of staying in contact with IAESTE!

From IAESTE Trainee to IAESTE Employer

"After a very short introduction period an IAESTE trainee is capable of working independently on small projects".

Mr Zahnd, what made you decide to apply for an IAESTE traineeship?

Despite the fact that a traineeship was a compulsory part of my studies, I wanted to take the opportunity to gain experience abroad. To do a traineeship with IAESTE made it all very easy as IAESTE took care of the whole administrative process.

I can highly recommend doing a traineeship

IAESTE Alumni Network: launched in January 2011 IAESTE started a new IAESTE Alumni Network initiative. The aim of the network is to unite all current and former stakeholders of IAESTE. Members of this network can stay in touch with their IAESTE contacts and the organisation itself. All members will receive regular updates about the organisation and profit from attractive offers such as career opportunities, information about events, conferences and more.

Sign up on alumni.iaeste.org and start IAESTE-networking!

Ten years ago, while he was a student in Mechanical Engineering at ETH, Jürg Zahnd travelled to Oman and Hong Kong to gain practical experience during two traineeships. Today Jürg Zahnd works in the operations sector at Biotronik, a medical device company, where he employs IAESTE trainees himself. So far he has supervised one student from Poland and one from Slovenia.

abroad. Not only do you get an insight into professional life but even more importantly you strengthen your intercultural experience. You get to know people and country from a very different perspective than you would do by travelling as a tourist.

What is your best memory about your traineeships?

It is hardly possible to extract a single memory from the whole experience. It was extremely impressive to dive into two completely unknown cultures: the Arabic life style in Oman and busy daily life of a real metropolitan city like Hong Kong.

But to name two strong memories that come into my mind spontaneously: I will always remember the "zero-gravity-place" in Oman and my first squid salad in Hong Kong.

After your traineeships you also joined the local committee. Can you tell us more about that experience?

Exactly, I was responsible for the finances of the LC during 2 or 3 years. It was a good opportunity to gain practical experience in the field of finance and accounting and was a chance to give something back to IAESTE. I also really enjoyed making it possible, that the time the foreign trainees had here in Switzerland was unique and unforgettable.

Why did you decide to employ an IAESTE trainee at Biotronik?

When I was contacted by IAESTE there were two crucial points that led to the decision: Firstly, it is vital for the IAESTE programme and Swiss students to have Swiss companies that offer traineeships for foreign students. By offering a placement at Biotronik I can directly contribute

to a great experience both for students from Switzerland and from abroad, in the same way I was able to some years ago. Secondly, I am convinced that IAESTE trainees are strong candidates with a great educational background and are able to offer valuable support to our work. Furthermore, it is very helpful that IAESTE takes care of all the administrative work and organises a social programme for the foreign trainees.

How can you personally profit from foreign trainees?

As mentioned earlier, trainees have the most up-to-date education and are equipped with basic tools of their field. And these tools are applicable all over the world. After a very short introduction period an IAESTE trainee is capable of working independently on small projects. And the pleasant side effect of all this: An international trainee enriches our every day work!

Where do you see the biggest difference between your traineeship back in 2001 and your current IAESTE trainees in your company?

The biggest difference lies in the aim of today's trainees. My main focus was to gain experience abroad whereas the IAESTE trainees at Biotronik take back home a lot of in-depth knowledge about their area of interest. It is important for us that a trainee's work is meaningful and leaves traces within the company.

How important is it, to be part of the IAESTE-Network?

I am still in contact with people from my own time as a trainee and active member in IAESTE. However up until now, I did not yet use the IAESTE Alumni Network for personal or business purposes.

**Do you know Jürg Zahnd from his time as trainee, active IAESTE member or employer?

IAESTE International

Volvo Car Corporation in Göteborg and Volvo Construction Equipment in Eskilstuna have been honored with the International IAESTE Employer's Award in recognition of their long standing support and participation in the IAESTE programme.

The first time Volvo is mentioned in the IAESTE Annual reports is in 1950; AB Volvo-Pentaverken in Skövde. At that time Sweden received 344 students and sent 184. Since then many students from all over the world have had the opportunity to be a trainee at different Volvo companies in Sweden. Between the years 1986-2010 more than 1.200 students have been working during a period at Volvo in Sweden. Some of them even became employees, in Sweden or in other countries. Volvo was founded 80 years ago, years full of events. See www.volvo.com and www.volvocars.com for more information.

Below you can read about experiences of some of those primarily involved in the IAESTE activity at Volvo Car Corporation in Göteborg and at Volvo Construction Equipment in Eskilstuna.

Rolf Mattsson, Volvo Car Corporation, Göteborg

One day two young Americans knocked on my door, asking if we might have some job for them at Volvo. I fixed that. They worked here for about six months and gave a lot of energy to the department during that time.

Rolf Mattsson's job with trainees started in a very spontaneous way in 1998. And the result was so successful that the cooperation continued with Rochester Institute of Technology, RIT. Since 2002 the trainees from RIT are coming within the frame of the IAESTE.

- The IAESTE traineeship is of great importance for Volvo all over the world. For every ten students we accept ourselves the enterprise gets a thousand "ambassadors" abroad. A very good PR for Volvo! The enterprise also takes a direct advantage of their work. For example, practically on his own, one of the trainees invented and built a security construction which later was used in the Volvo cars. The work of the trainees always serves a practical purpose. There tasks are never any make believe "Donald Duck jobs", Rolf Mattsson says.

The exchange of trainees also helps in the large context of modernizing technical programs at educational institutions over the world. The technical development is extremely fast within the automobile industry.

The young ones willing to explore the world are often open minded and daring persons, ready to make it on their own. A young woman who came to Volvo also brought her child, somewhat unexpectedly, a three year old son. Child care could have been a problem, but she solved it quite by herself. She was an unbelievably enterprising and clever young woman also at work; she never saw any obstacles, only possibilities. A real good example for her workmates!

The exchange of trainees has increased our knowledge of other languages and cultures. And the information about good experiences of trainees have spread within Volvo so if a trainee would like to work temporarily in another department it's always possible. The trainees are satisfied both with the job and the workmates at Volvo and many of them would like to stay

al Employer Award

Article by Tryggve Gustafsson

longer than they planned, and some of them do.

They learn a lot about working life at Volvo and in Sweden; our informal way of working, our habit to talk and solve problems at the coffee break, and that it's easy to get in touch with the chief. The Swedish model of work is exported.

You and the trainee often get to know each other personally. Therefore, I could easily recommend a former trainee when an employer unexpectedly called me from California, even if the work in question was of a quite different kind. One Canadian who came back with his sister after a few years stayed with my family for some time. Now and then a former trainee sends a greeting from abroad.

Rolf Mattsson now is head of a department for strength tests of the cars. The work there mainly concerns theory and analysis. It's often more interesting for technical trainees than working in the plant, says Rolf Mattsson. Now he is waiting for his next trainee, from Mexico. Rolf wants to continue having trainees as long as he can and he wishes Volvo will accept even more of them.

- They give us much more than they actually cost. And it's our own future we help creating in that way.

Alexander Broniewicz,

Volvo Car Corporation, Göteborg

Alexander Broniewicz has worked at Volvo for almost 30 years and has a long experience of exchange students; first as a tutor and constructor himself, then as manager. The collaboration with the trainees is fruitful in all aspects. They are mostly very good at their work; they are ambitious and solve their tasks excellently. From the human point of view they increase our knowledge concerning work and working conditions and also the habits in enterprises all over the world, and of other cultures. My department at Volvo has taken trainees from all continents and countries, like Colombia, Nigeria, Egypt, Malaysia, Australia and the US, to mention only a few of them.

There is another important aspect concerning trainee exchange we should not forget. By offering traineeship ourselves we make it possible for young people from Sweden to work in enterprises all over the world. I wish profoundly that Swedish enterprises could take even more IAESTE trainees than today. The costs for traineeships are extremely well motivated. The impression trainees leave behind is very good, almost without exception. IAESTE, at that, does a very good job and the trainees are taken care of by the organization in the best way, also on the local level.

Carl-Henry Lindgren,

Volvo Construction Equipment, Eskilstuna

-We have now taken IAESTE trainees for ten years,

one or two every year. I became interested in the activity and the assembly department was ready to try. Our first trainee was a success and we decided to continue. Our trainees have come from all over the world, from Uzbekistan, several from Russia, China, Germany, Mexico, Ireland, and Japan. This autumn will have a female trainee from Thailand!

The trainees are positive people who are very interested in the work at the factory, in the culture and in Sweden. And they give us the same knowledge about their own country in return.

Carl-Henry Lindgren is employed at the personnel department. As such he knows very well the value of

"For every ten students we accept ourselves the enterprise gets a thousand "ambassadors" abroad."

IAESTE as an organization. IAESTE handles most of the necessary bureaucratic procedures with work permits etc. If that was not the case we could have difficulties in taking trainees.

Michael Andersson is technician of production and tutor for the trainees at the assembly department. There they can see and learn about production on the spot and how theories are being put into practice. The trainees get a good feeling for that before they leave, he says. A few of them who wished have also got the chance to study other moments of production in neighboring Volvo factories. As for ourselves, we are around thirty employees here, we have been very happy to work and spend some of our free time with the trainees, and we can brush up our English, both for work and everyday life. The trainees also have been happy to stay with us. One of them spent Christmas with my family.

IAESTE Local Co - Inspired by the work experience

The IAESTE Local Committee (LC) Melbourne has recently undergone exciting changes and more have been planned for the future.

In 2010 the LC appointed its first president and in 2011 responsibilities were redistributed via the establishment of an organisation structure. This decentralisation has allowed opportunities for LC members to get involved and has fostered greater understanding of what needs to be done.

The IAESTE LC Melbourne Board is composed of our president and the three directors from each of the yellow Triangle's (T). Our president doubles as the Director of the Strategy & Admin T and is supported by the Directors of the other T's. Managers in each T support the directors and in turn, assistants support the managers. We have a large general LC member base as well which help when it is convenient.

The majority of our key LC members have been on an international traineeship themselves, and through this international

work experience they have been inspired to involve themselves in the LC community locally in Melbourne.

The lessons learnt on these traineeships have proved invaluable and priceless to those who have undertaken them, and most are hunting down a second traineeship opportunity shortly after returning. It is clear that working internationally provides students with a vast array of industry skills in such a short time, and not to mention a rapid

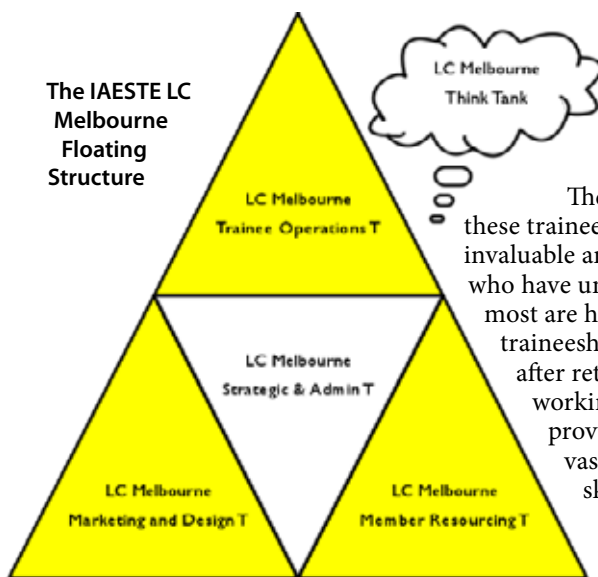

individuals' social network through socialising with other students from around the world as well.

The LC Melbourne supports the IAESTE Australia national office (based at Swinburne University of Technology in Melbourne) and recently has become an officially recognised club of Swinburne University's Student Services and Amenities Association (SSAA). Our membership with SSAA has proved useful with access to campus facilities and financial support of the LC's pursuits.

We hold IAESTE weekend events once a month and meet more locally on a fortnightly basis. In the last few months, over 60 LC members and IAESTE trainees have enjoyed an active social calendar. This has included the Formula One Grand Prix, Melbourne comedy festival, surfing trips, fortnightly barbeques and the footy. Every trainee has been involved or at minimum been informed of all our activities and events.

In the near future, Trainee Operations is the LC's focus as we'd all like to improve consistency and feedback in our event and buddy systems

committee Melbourne value of international and networks

(each overseas trainee is allocated a LC buddy). Additionally, we have developed an in-house new LC member application system and will produce a professional event banner. Aside from these local goals we would like to foster growth in other LCs on both a national and international level.

Our prospects for 2012 are undecided until the end-of-year board meeting, however, plans and goals for 2012 are being discussed. Talks have included greater independence within our LC and our wish is to pursue LC promotion and job raising. We would enjoy contacting prospective employers and liaising with other universities for ourselves and incoming trainees. As currently this is done through the national office and on an irregular basis by LC members wishing to help.

It's 'hard yakka' as an LC Melbourne member but we are excited to see results at the end of 2011 and we know this effort will assist our organisation to mature in time for 2012 and onward.

Working internationally provides students with a vast array of industry skills in such a short time

Seminar on

The 26th Seminar on IAESTE Development was held in Valencia, Spain from 7th to 10th of April, which was also a very special occasion as it coincided with the 60th anniversary of IAESTE Spain. A total of 58 participants from 26 different countries flew to the sunny Spanish city to attend the meeting.

The guests were met at the Holiday Inn hotel located next to the City of Arts and Sciences, one of the most emblematic and visited icons of the city, and a symbol of Santiago Calatrava's modernist architecture. Participants were welcomed by Cesc Cabrespina, IAESTE Spain President and after the Opening Ceremony a small aperitif was served next to the hotel's swimming pool accompanied by some traditional music.

The Seminar itself took place at the beautiful campus of the Universitat Politècnica de Valencia, surrounded by greenery, where delegates could choose among 4 working groups: WG #1: Administration and IPLUG (IntraWeb); WG #2: Strategic Marketing; WG #3: Alumni; WG #4: Strategic development, each led by experienced Work Group Co-ordinators. Within these, 18 different projects were developed, with a flexible, dynamic working schedule so that participants could contribute to more than one topic and were encouraged to collaborate between

at the Closing Ceremony, with the help of a poster fair, however, the creative buzz emanated throughout the three days, at the dinner table and even on the walk around the city, as participants enthused about developing IAESTE A.s.b.l.

Thanks to the sincere motivation of participants and sterling work of the Work Group Co-ordinators, many new ideas were developed, new strategies created and excellent proposals for how to move our Association forward were made. Once again, sharing best practice, information and experience was the source of much creativity and success. To touch on just a few of those developments: an Online Knowledge database has been created and is being tested to provide an online wiki of information such as the Practical Guide, standard forms and Frequently Asked Questions; the Administrative Efficiency questionnaire is being moved online; new emergency guidelines have been produced to increase student welfare across the Association; the post of Fundraising Manager along with new Partnership Packages have been proposed; and significant work has been done on the IAESTE Alumni Network to ensure we make use of its full potential. This work, along with everything else discussed at SID, makes great in-roads to implementing the Action Plan and is in line with Task Force recommendations. For more details please refer to the SID Minutes, available in our IntraWeb.

Besides the hard work, the Valencia LC had prepared a series of social events such as a visit to the historic centre, and the Gala

Sharing best practice and experience was the source of much creativity and success

Working Groups where topics over-lapped. Participants had the opportunity to explain and share their work with each other on Sunday

Lucy Everett
SID Co-ordinator

IAESTE Development

Dinner, which took place on Friday night in a prestigious restaurant located on the outside of Valencia. The surprise of the night was the cake that IAESTE A.s.b.l. General Secretary, Mr Goran Radnović, gifted to celebrate the 60th Anniversary of IAESTE Spain. After the dinner a live band played some hits and even some Board Members had a dance! Saturday night was the time for the International Evening, where all the guest could see traditional Valencia's region costumes and taste the delicious paella in three different varieties: with meat, with seafood and a special one for vegetarians! This event took place in a Fallas' house (Casal fallero in Spanish), a place where people from Valencia usually gather in order to prepare and celebrate the huge Fallas festival. Obviously there was also food and drinks from all the other countries brought by the SID attendees.

IAESTE LC Valencia took the opportunity of hosting the SID in their anniversary year, to exhibit a photographic history of IAESTE in Spain. It included photos of General Conferences, previous SIDs, and some special pictures showing the great range of possibilities offered by our Association through the eyes of the Local Committee members on their own internships, e.g. Serbia, Croatia, Ghana, Thailand, Australia, Hong Kong or Argentina.

A big THANK YOU to our hosts, IAESTE Spain, to all sponsors, and especially, to all members of IAESTE LC Valencia who made this Seminar such a success: Andrés, Josep, Joan, Ana, Eva, Pilar, Elena, Sergio, Bosch, Xema, Héctor, Bartek, Paco, Pau, Henoc, Aarón, David and Marek.

Last, but definitely not least, we would like to thank everybody who attended and worked so hard to make the Seminar on IAESTE Development 2011 such a positive and productive time. We look forward to effective collaboration throughout the year, so that

we can ensure much ground work has been done for the General Conference in January and move on to a successful SID next year in Austria.

Together we can continue to develop the IAESTE Association to be better for our employers, our students and all of us!

Tomasz Pawliszyn
JUMP Co-ordinator

JUMP 2010

16th IAESTE Training and Motivation Seminar JUMP (Join Us to Motivate People) took place in a calm and a beautiful neighbourhood of Oslo in Norway between 29 September and 03 October 2010. It was a truly successful event with over 90 IAESTEers from 22 countries.

All participants enjoyed five training sessions led by experienced IAESTE members and a series of motivational events.

The main aim of the training sessions was to teach young members the essence of IAESTE activities and best practices. Those were: Introduction to IAESTE, LC Management, Administration, Job Raising and Company Marketing, and they were led by Daniel

Huppmann from Austria and Member of the Board, Annelies Vermeir from Belgium, Katja Prnaver from IDT, Marianne Steinemann from Switzerland, Krzysztof Kin from Poland and Anna Szeles from Hungary.

In addition to the training sessions, there were plenty of motivational events aiming to inspire people to work for the organisation, show how to achieve what seems

to be impossible, and show that IAESTE is not only exchange of offers, but also friends, travel, and good fun. The main events in 2010 were: two motivational sessions with Marcus Orlovsky, National Evening with delicious Norwegian cuisine and company speakers (DNV - global risk management company and Statoil - leading energy company), famous Viking Tournament, night

forest orientation run, Oslo sightseeing, IAESTE Dance classes, IAESTE Ideas Exhibition with topics not covered by the training sessions and of course the International Evening. In addition, we were honoured to be visited by GS Goran Radnović whose presence elevated the importance of the event and gave the rare opportunity for IAESTE beginners to listen and speak to the head of the organisation.

The event was hosted by IAESTE Norway and coordinated by a great team led by Torunn Kjeldstad, who did a truly remarkable job making the JUMP 2010 an unforgettable event.

We are also grateful to our sponsors DNV, Statoil and SKF, who helped to make this event such a success.

JUMP2010 brought many changes to the JUMP itself. The event fee was lowered by 33% to EUR 100 (all-inclusive) and packed with more activities. In addition, new permanent website was set up to build a platform from the next JUMP, popularise the event and share all the training presentations all year long. The website is supported by Facebook page (IAESTE JUMP), Twitter (IAESTE_JUMP) and YouTube channel (IAESTEJUMPChannel). There were also remodelled training sessions to suit better IAESTE needs, with two trainers per session in order to train and evaluate new generation of trainers. As a result the 2010 event was oversubscribed by 30%!

JUMP2011 will be organised by LC Zurich, in Winterthur, Switzerland between September 28th – October 2nd. There is an ambitious plan to make this event even better. The whole team is already working hard to invite even more people, improve the training sessions and make the motivational events even more inspiring. In addition, there is a plan to extend JUMP by a one day and dedicate it exclusively for trainers' development session called "JUMP on Train", where current and new potential training sessions' leaders would get a professional tutoring in training and presentation skills. There are also serious efforts to cooperate closely with the IAESTE Alumni.

JUMP
by IAESTE

25th CEC

25th CEC was held in hotel „Mercur“ in Orahovica, Croatia, from 29th of April till 1st of May. 168 IAESTE members participated in this year CEC which includes organization team from IAESTE Croatia.

Vanja Paulik
CEC Organizer

On Friday all participants were welcomed by our lovely welcome committee, received welcome packages and sent to rooms to get ready for the gala dinner.

Before dinner, there was an opening ceremony where Josip Nemec, the Major of Orahovica city and Marko Đukić, the principal of Red Cross said a few words about Orahovica, saluted all participants and wished a great and successful weekend to everybody. The National secretary of IAESTE Croatia, Milan Kordić, also gave his contribution to this ceremony and invited everybody to feel like at home.

Dinner was followed by presentations of each country. The theme of presentations was “Five things that connect my country with Croatia”. It was very interesting to hear original and funny facts that other countries found related to Croatia. Similarities such as food, drinks, songs, landscapes, history facts and sports were often heard. Finally, everyone enjoyed dancing and mingling on housewarming party, which included live band and cheap drinks.

Surprising fact on Saturday morning was that all the members of IAESTE Croatia woke up and were ready to participate in work groups. Unfortunately, the same cannot be said for everybody as we had some problems with members of IAESTE Slovakia which thought it was very funny to do practical jokes instead of learning how to improve the association. Seven different work groups were held – Jobraising & Fundraising, Mini-Guide to IAESTE, Marketing & Member-raising, Outgoing, Summer Reception & Alumni Network, Strategic Development and LC Management.

As weather forecast was not very promising, we decided not to climb the hills and visit Rose city. Instead, participants took a walk to the city center and had an opportunity to see performance of Knights Order of Rose City! They were allowed to try on helmets, to shoot from a bow and arrow, to fight with a sword

and to take a cool picture, as well.

And finally, the big finale of the weekend was of course the international evening. Tables were set, drinks were poured, delicious food was out in the open and by 8.30 p.m. everything was ready for the party of the weekend. Each country presented what they have brought for others to try. It is impossible to list all types of food and drinks that were presented on tables, but one thing is sure – they were all consumed in no time.

Some participants had to leave early on Sunday, but for those who stayed there were more surprises! Work group leaders presented the main work group conclusions, our sponsor Contact Singapore had a small presentation and Hungarians introduced us to the next CEC

26th Central European Convention will take place in Hungary this autumn

which will be held in October. As the official part of CEC was over, everybody was invited to try some of traditional Croatian food and while entertained by a band which played traditional music.

IAESTE Croatia and CEC organization team wants to thank all the participants for coming and sharing their experience, friendship, songs, laughter and memories with us. We just can't wait to see you all again!

Dina & Vanja

Dr Pulat Pulatov
Chairman of the AIF

The second Asian IAESTE Forum

The second Asian IAESTE Forum(AIF) was held from the 13th to the 17th of November, 2010 in Damascus, Syria. The forum was attended by representatives from 13 member countries of IAESTE, members of the IAESTE Board, General Secretary Mr. Goran Radnovic, heads of almost all the leading Syrian universities, employees of the Ministry of Education, members of the Syrian parliament, Minister of Higher Education, Prof. Ghayath Barakat.

The forum was opened with the speeches of Minister Prof. Ghayath Barakat and Mr. Goran Radnovic. The forum then heard the report of Dr. P. Pulatov about the state of IAESTE in the Asian region and the ways of developing IAESTE in Asia. Each country presented a report on achievements and challenges in the works of IAESTE in their home country.

Dr. Tongdee Cheevapruk, National Secretary of IAESTE Thailand, informed the forum participants about the preparations for the 64th General Conference in Bangkok, and with her excellent performance put an end to various negative rumors. All participants expressed their gratitude to her work, congratulated her for receiving a degree of Doctor of Science and for the appointment of Dean of the faculty, expressed their support and readiness to render any assistance to IAESTE Thailand in holding the General Conference, if such assistance is needed.

Forum participants were also welcomed by representatives of the Youth Union of Syria and Syria's Trade Unions. Participants of the forum visited the biggest and most famous University

- University of Damascus, where they were received by the President of the University. The forum participants visited University's Engineering faculties and laboratories. Participants also visited Homs Oil Refinery and Crac des Chevaliers, one of the most important preserved medieval military castles in the world. There was also a 2-day mentoring workshop for participants of the forum and new countries such as Qatar. After the forum, Qatar University, applied and became a Co-operating Institution.

Participants of the forum adopted a resolution of the forum and advices of the forum for IAESTE Asian countries. The Forum also elected the Board. Dr. P. Pulatov was re-elected as the Chairman of the Forum and Mr. Ali Abou Khoder (NS of IAESTE Syria) was elected as the Vice-Chairman; Dr. Tongdee Cheevapruk (NS of IAESTE Thailand), Dr. Chaleb J. Sweis (IAESTE Jordan) and Mr. Vivek Anand (India, MIT) were elected as the Board members.

The Forum participants have accepted the invitation of Azerbaijan to hold the Third AIF in Baku, from 16 to 20 November 2011.

Participants of the Forum and Board Members of IAESTE thanked the Ministry of Higher Education and personally the Minister of Higher Education, Prof. Barakat and IAESTE Syria for the excellent organization of the II AIF.

Waled Abdulla Mukahal
Person in Charge

IAESTE welcomes Qatar

Qatar is a peninsular nation located halfway down the west coast of the Arabian Gulf, which has emerged as one of the world's most important producers of oil and gas. It is an Islamic State, whose laws and customs follow the Islamic tradition. Since 1995, the country has been governed by H.H. Sheikh Hamad bin Khalifa Al-Thani, the eighth Emir from the Al-Thani family. The official language is Arabic, though English is commonly spoken.

The State of Qatar has developed a national vision (Qatar National Vision 2030) to guide the development of all sectors in Qatar. The vision relies on four pillars, namely: human development, social development, economic development, and environmental development. Investing in education presents the key foundation for human development and an enabler for the other three pillars. Qatar has a proven record of progress and development on all levels including economic and political levels. The potential the country has enabled it to win the bid for world cup 2022, and put it in a position to bid for other mega events competing with leading developed countries in the world.

Qatar University is the national institution of higher education in Qatar. It provides high-quality undergraduate and graduate programs that prepare competent graduates, destined to shape the future of Qatar. The university community has diverse and committed faculty who teach and conduct research, which address relevant local and regional challenges, advance knowledge, and contribute actively to the needs and aspirations of society.

One of the objectives of QU is to provide its students with the necessary skills to compete on the international level. International exposure through student exchange programs presents a key means in achieving this. Working in a new environment and living abroad helps students develop their personal and technical capabilities, and gain new skills through intercultural interaction. Joining IEASTE provided our students the opportunity to learn, work, and improve their language skills in a supportive new environment.

In 2011, the State of Qatar joined the IEASTE family through Qatar University (QU) as a Cooperating Institution. During this year, QU sent out two students to the UK and Germany, and hosted one student from the UK. QU joined the IEASTE through the College of Engineering, which offers eight programs in six departments, four master's degree programs and PhD degrees in twelve programs. QU will include the College of Arts and Sciences in the exchange process for the upcoming years, and also seeks to attract other institutions within the State of Qatar to participate.

A UK student underwent practical training during summer 2011 at the Qatar Petrochemical Company Ltd. (QAPCO), which is one of QU's supporting institutions. QAPCO is one of the leading producers of ethylene and low-density polyethylene (LDPE) in the Middle East Region. In addition, QU is supported by other major oil and gas companies in Qatar, such as QAFaq and RasGas.

We are particularly grateful to IEASTE Germany and UK for their support throughout this year, and especially grateful to IEASTE General Secretary Mr. Goran Radnovic, for his cooperation.

"Qatar has a proven record of progress and development on all levels including economic and political"

support services to IAESTE

Daniel Schwarz
IDT Co-ordinator

Internet Development Team (IDT)

The IDT, Internet Development Team, was founded in Copenhagen in 1998 by volunteers from five different countries, with the goal to deliver IT services to IAESTE. Today thirteen volunteers from ten countries are involved in IDT.

The services include anything which the organisation requests, such as web and e-mail services. The web services include a private website, the IAESTE IntraWeb; and provides technical assistance for the Alumni Association.

The IDT maintains the public website, www.iaeste.org, which provides information on IAESTE and links to all Member countries' home pages and contact details.

*Bruce Mehlmann-
Wicks*
Alumni Relations
Manager

IAESTE Alumni Network (IAN)

The new online IAESTE Alumni Network was successfully launched in January 2011 and is supported by the Alumni Relations Manager. Over 3000 people have already registered and the number continues to grow each day.

Members are contacting old friends from years gone by and sharing their experience through writing articles or uploading photos and video. They are also attending alumni events and making new contacts for further professional development. In addition, the network is proving to be a very useful tool for managing summer social programmes for current trainees.

Alumni are essential to the future of IAESTE. They can support us in numerous ways, for example, acting as ambassadors or being a source for placements or financial support. Furthermore, access to a network of highly motivated and experienced scientists, engineers or architects, is a very attractive proposition for potential sponsoring companies.

The IAESTE Alumni Network allows us to engage with our alumni like never before and to form mutually beneficial relationships with them.

Lucy Everett
SID Co-ordinator

Seminar on IAESTE development (SID)

SID serves IAESTE by bringing together IAESTE Members and Co-operating Institutions to discuss issues of best practice, administration, organisational advancement and the development of the Organisation. Unlike the Annual Conference, which focuses on the exchange of traineeships, SID provides a structured forum for delegates to discuss ideas and actions to improve IAESTE as an International Organisation. Work Groups work on specific tasks requested by the General Conference, the IAESTE Board and the Membership at large provide the topics to be discussed at SID. In addition, a number of ongoing tasks such as Mentoring, Annual Conference Introductory sessions and updating of IAESTE Forms and materials are tackled by SID. The results from the Work Groups are refined over the year into recommendations that go back to the Board and then to the General Conference for official voting and implementation.

The IAESTE Ombudsman

The post of Ombudsman was created by a decision of the 2001 General Conference of IAESTE held in Durban. The Ombudsman is an independent person, to whom students can report complaints about unfair treatment, with the aim of arriving at a fair settlement. The Ombudsman reports to the General Conference each year about all incidents reported to him from students. He also proposes measures to prevent similar incidents in future.

Riitta Uotila-Kataja, the former National Secretary of IAESTE Finland, is the IAESTE Ombudsman.

For further information on the Ombudsman please go to www.iaeste.org or contact her at either ombudsman@iaeste.org or write to

Office of the Ombudsman
