IAESTE Association sans but lucratif. Registered in Luxembourg

Welcome

Welcome Friends of IAESTE

As we celebrate 60 years of exchanging students in IAESTE, welcome to this special edition of the Annual Review. The Association reached this wonderful milestone in January 2008 when the world met together in Jordan, for the first time at an Annual Conference in an Arab country, to celebrate this remarkable achievement of exchanging 322,181 students from 103 participating countries in the years 1948-2008. We have come a long way since its inception at Imperial College, London in 1948 and have inspired and changed the lives of many people of all ages, colours and creeds in that time.

As we prepared for this special birthday we were delighted to receive a letter of congratulations from the Secretary General of the United Nations, Mr Ban Ki-moon, which was read at the Opening Ceremony at the Dead Sea, a very significant venue for our Anniversary Conference. It is included in this edition of the Annual Review as a permanent reminder of our association with the United Nations and its Agencies.

Since January 2008 IAESTE has received sponsorship from 2 new Companies, Yantai Wanhua and Alstom. We are delighted to work together with our new partners and are excited at the new opportunities which will become available for IAESTE students in the foreseeable future especially as there are many Companies, particularly in Europe, looking for Engineering Graduates – young men and women who are able to fill positions requiring International leadership skills which IAESTE trainees can acquire during their placements.

It was a momentous occasion for all of us who attended the Seminar on IAESTE Development this year in Stavanger, Norway, when we met and spoke with one of the Founding Fathers of IAESTE in 1948, Mr Hans Breder. He assured us that indeed he was very proud of what IAESTE had achieved in the last 60 years and that should make everyone who works

so tirelessly and selflessly all over the world for the IAESTE programme feel that all the hard work is so worthwhile.

Anniversaries are a time to look back and reflect on times gone by, but as we continue to celebrate our Anniversary throughout 2008 with special events, we also look to the future as we continue our journey to improve our Association in partnership with our Employers, Academics and Students.

Pauline Ferguson
General Secretary
IAESTE A.s.b.l.

Mr Goran Radnović
President
IAESTE A.s.b.l.

THE SECRETARY-GENERAL

4 January 2008

Dear Ms. Ferguson,

I write to thank you for your invitation to the sixtieth anniversary Conference of the International Association for the Exchange of Students for Technical Experience (IAESTE), to be held in Jordan. Although unable to attend, I offer my full support to this milestone gathering, which marks six decades of experience in forging international ties among youth in scores of different countries across the globe.

During these fruitful years of promoting educational exchange across borders, the IAESTE has operated in consultative status with the United Nations. Beyond your formal ties to the United Nations Economic and Social Council and its Department of Public Information, our two organizations share deep founding principles. The United Nations aims to promote peace, development and human rights – all efforts that must be underpinned by the kind of cross-cultural understanding that the IAESTE fosters through its wide-ranging activities.

By broadening the horizons of students in the fields of education, science, architecture and agriculture, the IAESTE cultivates more than future professionals; it nurtures leaders of tomorrow capable of seeing the beyond their own national concerns to the challenges facing us all.

I hope this gathering of dedicated professionals will set the stage for even greater accomplishments. I wish you a most inspiring anniversary conference.

Yours sincerely,

Ban Ki-moon

Ms. Pauline Ferguson,
General Secretary
International Association for the Exchange of Students for Technical
Experience (IAESTE)

Our Organisation

The International Association for the Exchange of Students for Technical Experience (IAESTE A.s.b.l) is an Association of National Committees representing academic, industrial and student interests. Each National Committee is responsible for the administration of the exchange in its own country.

The Association was founded in January 1948 at Imperial College, London, on the initiative of the Imperial College Vacation Work Committee. National organisations of ten European countries represented at this meeting became Members and Mr James Newby was elected General Secretary. The geographical coverage was soon to spread to most of Europe and beyond, as new countries were admitted to Membership.

The Association became a registered body according to Luxembourg law at its General Conference 2005 in Cartagena de Indias, Colombia. It is a non-political, independent, non-governmental organisation, in operational relationship with the United Nations Educational, Scientific and Cultural Organisation (UNESCO) and maintains consultative relationships with the UN Economic and Social Council (ECOSOC), the United Nations Industrial Development Organisation (UNIDO) and the International Labour Office (ILO).

IAESTE is also in contact with the United Nations Economic Council for Africa (ECA), the Food and Agriculture Organisation (FAO), the Organisation of American States (OAS) and the European Union (EU), as well as with other educational non-governmental organisations.

National Secretariats and Committees make up the Membership of the Association. Each year the Annual Conference brings together the representatives of these bodies to decide on issues of general policy and with the IAESTE Co-operating Institutions to carry out the exchange of offers for training. Prior to the Conference, each Member and Co-operating Institution collects offers from Employers willing to receive students from abroad for

The Mission and Aims of IAESTE

MISSION

To operate a high quality practical training exchange programme between Members in order to enhance technical and professional development and to promote international understanding and goodwill amongst students, academic institutions, employers and the wider community.

IAESTE operates irrespective of race, colour, sex or creed.

AIMS

To provide students in higher education with technical experience relevant to their studies.

To offer employers well qualified and motivated trainees.

To be a source of cultural enrichment for trainees and their host communities.

a temporary training and work experience period relevant to the students' areas of study, as a complement to their university or college education. Companies or Institutions offering training are expected to pay students a wage sufficient to cover their cost of living during the actual training period.

The offers of training are exchanged with other Members and Co-operating Institutions mainly on a reciprocal basis. Through their affiliated universities and colleges, Members and Co-operating Institutions select qualified students to meet Employers' requirements as outlined on the training offer. Details of the selected candidates are sent to Employers for approval.

Participation in the IAESTE exchange is open to bona fide students attending courses at Universities, Institutes of Technology and similar Institutions of Higher Education.

For further information about IAESTE please visit our website www.iaeste.org.

General Conference

The General Conference possesses full power to take formal decisions for the fulfilment of the Aims and approves the budget and regulations of the Association. It is composed of one delegate from each Full Member country. It elects the Board and the General Secretary and meets every year in January.

General Secretary

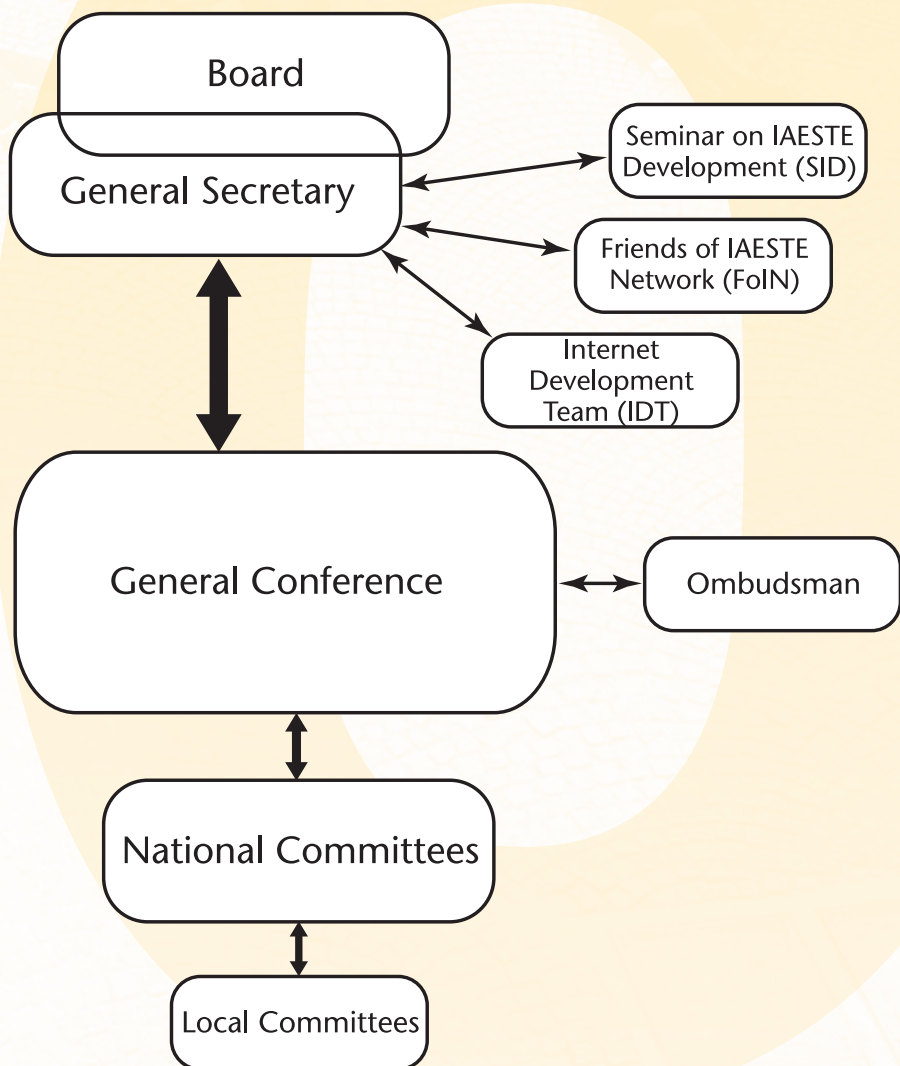

The General Secretary is elected by the Members to co-ordinate the daily administration of the Association and is a Member of the Board.

Board

The Board implements the Association's policy and decisions approved by the General Conference, initiates activities supporting the Association's policy in general and is responsible for the day-to-day management of the Association executed by the General Secretary. It is composed of four elected members and the General Secretary.

National Committee

National Committees represent the Member countries and are composed of persons representing academic, industrial and student interests.

REPORT:**General Secretary**

This report is a summary of the exchange activities between IAESTE Members and Co-operating Institutions during 2007. The details of these exchanges are presented in the 2007 IAESTE Activity Report published in November 2007. The exchange took place between 81 Members and Co-operating Institutions from 78 countries and 11 non-Member countries.

The 2007 IAESTE Activity Report contains the detail on the bilateral exchanges, study fields of trainees sent and received by each Member and Co-operating Institution, the number of participating Employers and Institutions, training periods, age, nationality and gender of the trainees and other useful comparative information. It includes detail on the exchange with non-Member countries. The report also contains a summary of the administrative procedures, reports

from Members and Co-operating Institutions on activity as well as the names of the staff handling the exchange and the addresses of the National Secretariats. Readers interested in this report may order a copy from the IAESTE National Secretariat in their own country or from the General Secretary.

Exchange Development in 2007

The total number of trainees exchanged in 2007 was 4745, 33 less than in 2006. However 48% of the Members and Co-operating Institutions managed to increase their number of traineeships for incoming students and this was very encouraging. Several countries made a significant increase in the number of placements offered to incoming students, notably, Ghana, India, Poland, Portugal and United Kingdom.

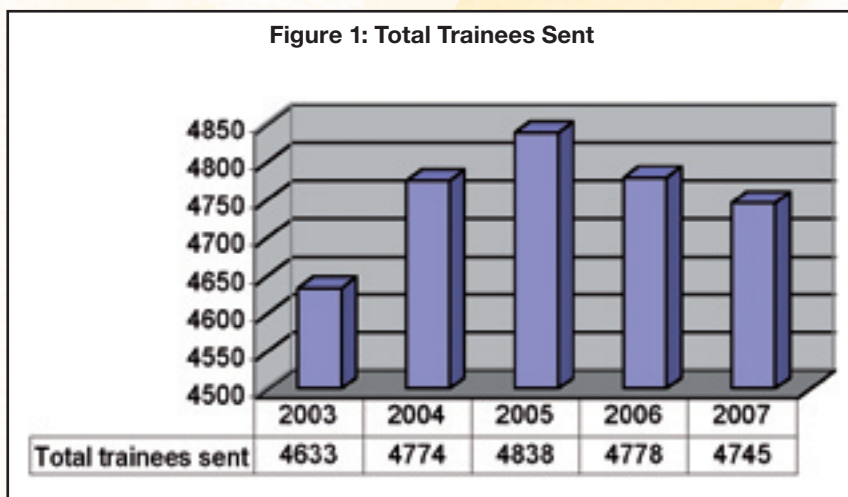

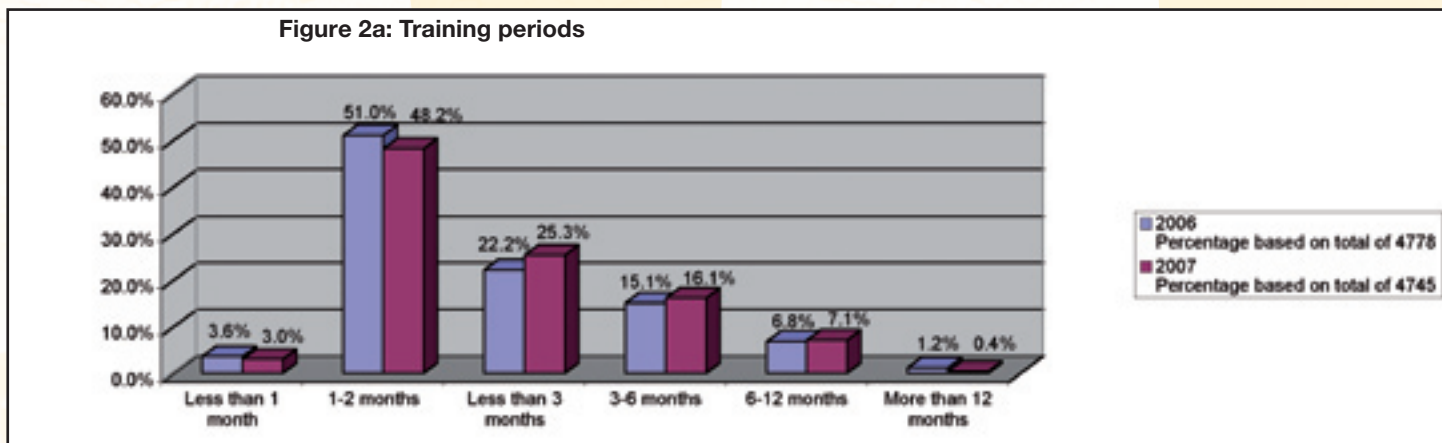

Figure 1: Total Trainees Sent

Figure 1 shows the number of trainees sent in 2007 and compares this with the previous four years.

Figure 2a shows the training periods for 2006-2007 with the majority of students on placements between 6-8 weeks.

Figure 2a: Training periods

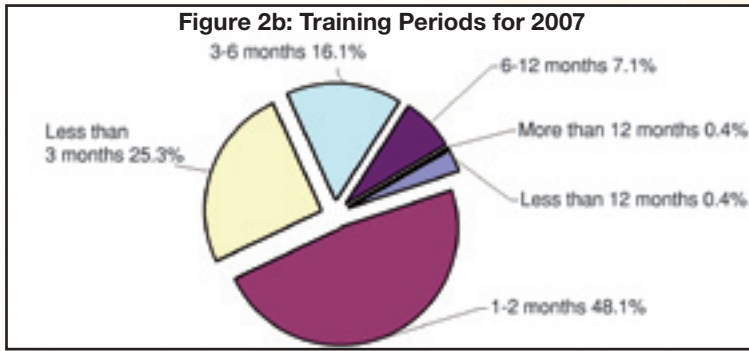

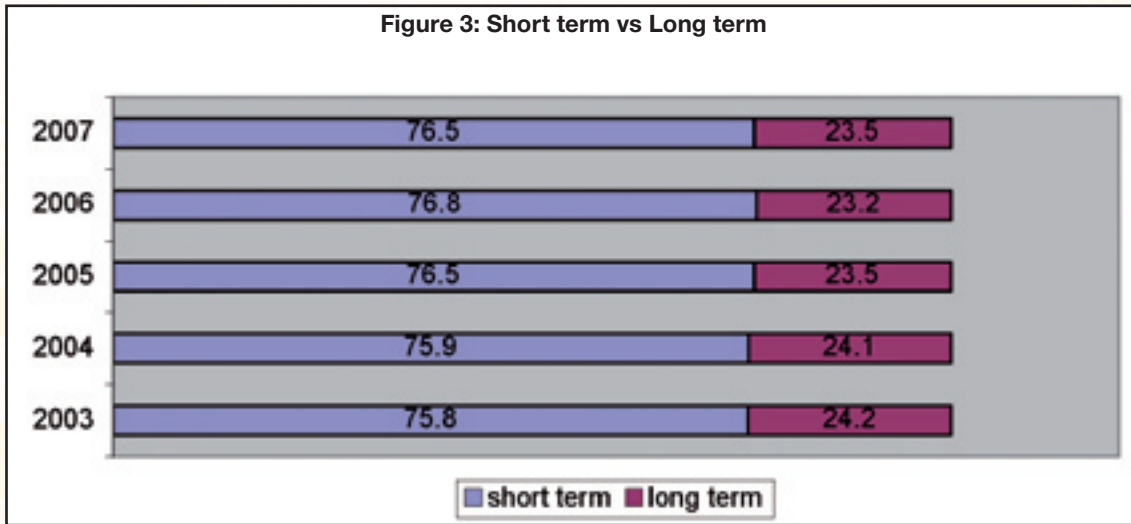

Figure 2b indicates the training periods for 2007 with 48.1% of trainees on a 6-8 week placement with 25.3% on placements lasting between 8-12 weeks.

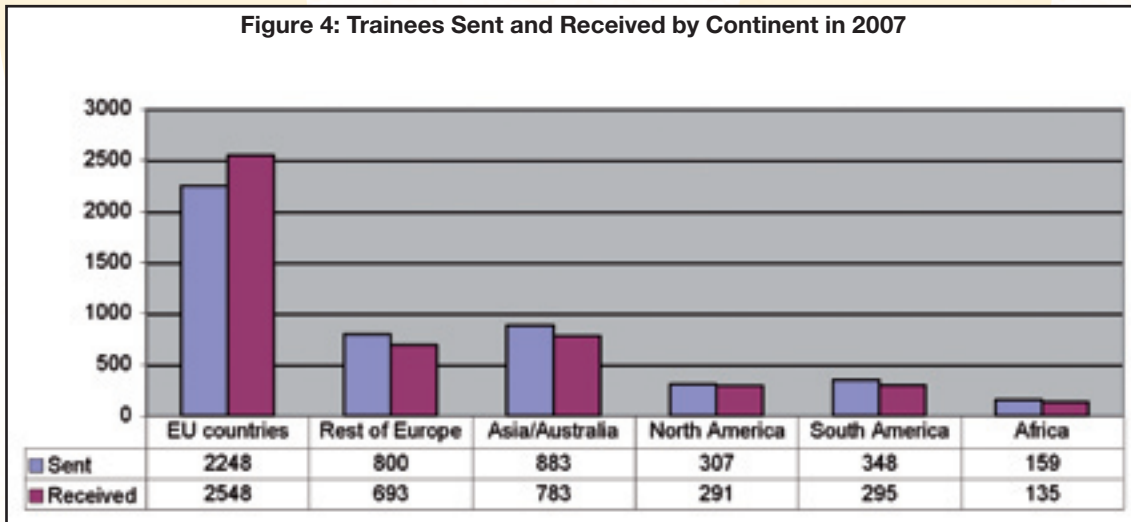

Figure 3 The number of trainees to benefit from long-term placements represents 23.5% of total placements in 2007, a slight increase from 2006.

Regional Exchange

The number of traineeships filled by students from non-European countries accounted for 28% of the number of students sent, on a par with 2006. However figures show that there was an increase in the number of students sent from Asia with new Co-operating Institutions in that region which is an encouraging sign. Numbers sent and received in North America declined in 2007.

Europe continues to dominate the exchange. Some 64.2% of all trainees were sent from EU and other European countries and 68.3% of all trainees were received in Europe, a slight increase from 2006.

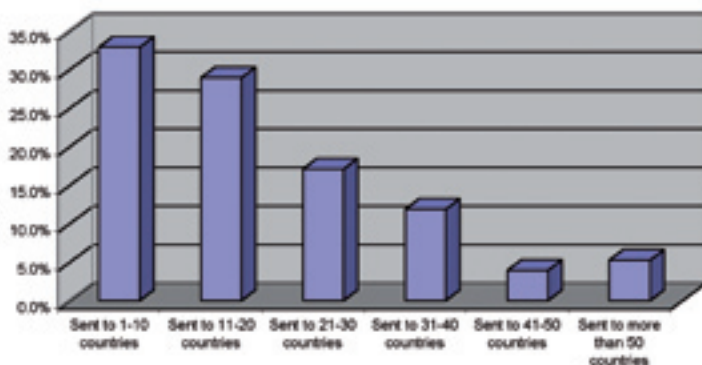

Sending and Receiving Continent

The open international exchange is clearly illustrated by the number of Members and Co-operating Institutions that exchange with each other. In 2007 each Member and Co-operating Institution exchanged on average with 18 other Members and Co-operating Institutions, one more than in 2006.

Figure 5 shows that 28.9% of IAESTE Members and Co-operating Institutions exchanged with more than 11 countries in 2007. 7 Members sent students to 41 or more countries.

Figure 5: Multilateral exchange

Growth of IAESTE

There is great interest in IAESTE throughout the world and on average 2 new countries per month contact the General Secretary asking for information on how to join the Association. Many contacts are made through our public website www.iaeste.org which has a daily average of 882 visits, a further increase from last year. Universities or Organisations committed to the Aims of the Association can apply for Co-operating Institution status and each year the Board reviews their progress at its summer meeting. Co-operating Institutions which are no longer conducting an exchange do not have their status renewed. New Co-operating Institutions take 3-5 years to become established and the benefits of this expansion, reflected in the exchange,

become clear after this period. They are then able to apply for Associate Membership and after a minimum of another 3 years can apply to be Full Members with voting rights. Since 2007, 7 new Co-operating Institutions have been welcomed into the Association: Unggulan Education Foundation, Indonesia, Cuttington University, Liberia, Universiti Sains Malaysia, Federal University of Technology, Owerri, Nigeria, University of Benin, Nigeria, POEC, The Philippines and Global Association of Training and Exchange (GATE), Republic of Korea. 88 Members and Co-operating Institutions in 84 countries constituted the Membership of IAESTE in January 2008.

The Association continues to grow outside Europe with increased interest from countries in Asia and most notably in Africa and we are very keen to expand our Membership in these areas.

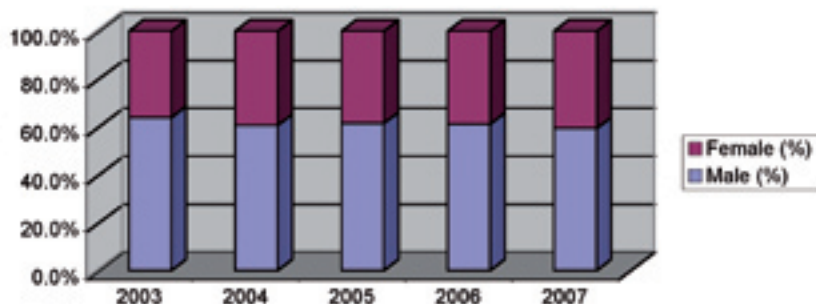

Reciprocity of the Exchange

The IAESTE exchange programme is based on a bilateral balanced exchange between Members. Most Member countries attempt to maintain a balance between outgoing and incoming students but an exact bilateral balance is rarely possible within any given year. Only long-term balance is sought. This flexibility is needed to support the proper allocation of places and the selection of the appropriate students.

In 2007, 34 Members and Co-operating Institutions received more students than they sent abroad and this benefited the rest. In total, 562 work experience places were involved or 11.8% of the total exchange.

It is traditional within IAESTE for Members with a higher Gross National Income per capita (GNI) to receive more trainees than they send. Strict reciprocity is not implemented with new Members in the early years which allow those in developing countries and those from smaller countries to gather support within their country in order to develop the exchange. Countries with a GNI per capita >12,000 US\$ provided 86% of these places in 2007, a big increase from 2006.

Figure 6: Gender balance

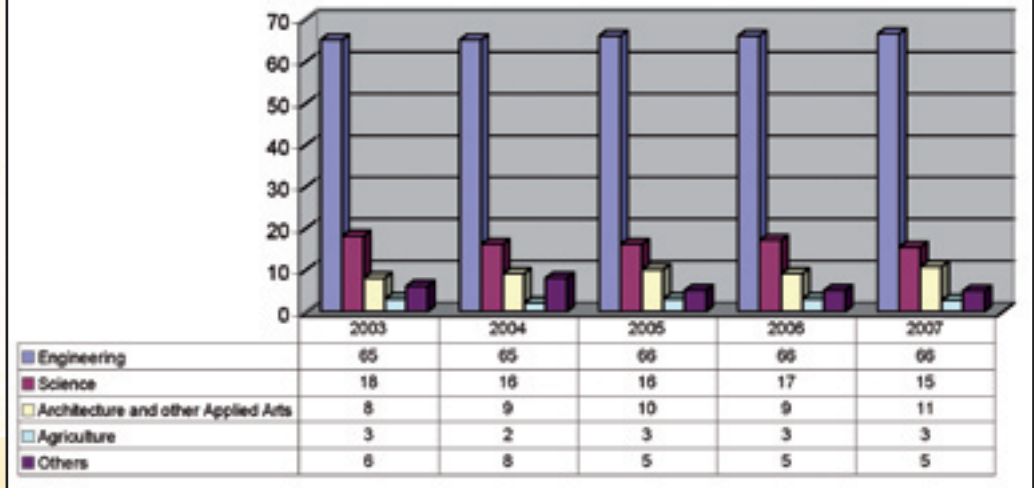

Profile of the student trainee

Gender balance and Age: Age and gender balance of trainees varies little from year to year but differs appreciably from country to country.

Participation by men and women students compared with previous years (%) is shown in **Figure 6**.

Figure 7a: Training specialities (%) based on trainees received

The percentage for individual Members or Co-operating Institutions varies from 37% to 96%. The gender balance relates to cultural and educational traditions in the IAESTE countries.

The age of trainees in 2007 ranged from 20 to 26 years with the majority (73.4%) being between 21 and 23. The average age is just under 23 years old.

Study fields: In 2007, 66% of trainees were students of Engineering and Technology. The remaining 34% were divided between the Sciences 15%, Architecture and Applied Arts 11%, Agriculture 3%, and other fields of study 5%. While placements in Engineering, Agriculture and Other Fields have remained stable there was an increase in Architecture and Applied Arts with a 2% decrease in Science placements in 2007. **Figure 7a and Figure 7b.**

In 2007 the largest of the Engineering Faculties was Computer Science 18.5%, followed by Mechanical Engineering 17.7%, Electrical Engineering 12.1%, Civil Engineering 11.1%, Chemical Engineering 7.4%, Electronic Engineering 4.4%, Industrial Engineering 3.3%, Telecommunications 3.1%, Environmental Engineering 2.6% and Aeronautical Engineering 2%. Indeed there was a 12% increase in the number of Chemical Engineering placements and Electronic Engineering fared better this year but the majority of traditional Engineering placements decreased. There was a rise in placements available in Geodesy, Mechatronics and Process Engineering. With the world so aware now of climate change and environmental issues, offers in this field are increasingly popular. Placements in Geography, Environmental Science and Microbiology saw an increase in numbers in 2007.

Sub-dividing the Engineering groups gives us the breakdown between the major participating disciplines. **Figure 8.**

Figure 7b: Training Specialities based on Trainees Received

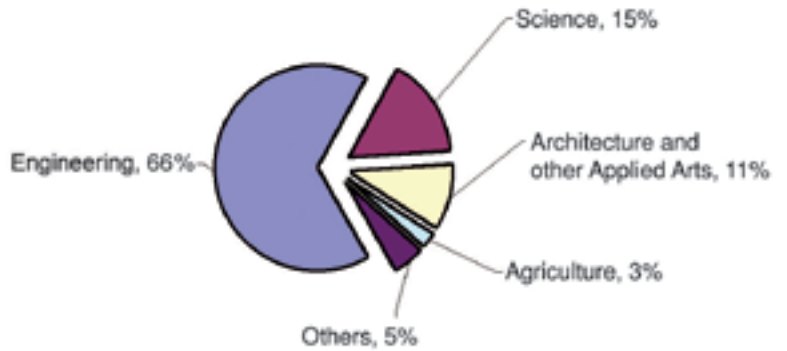

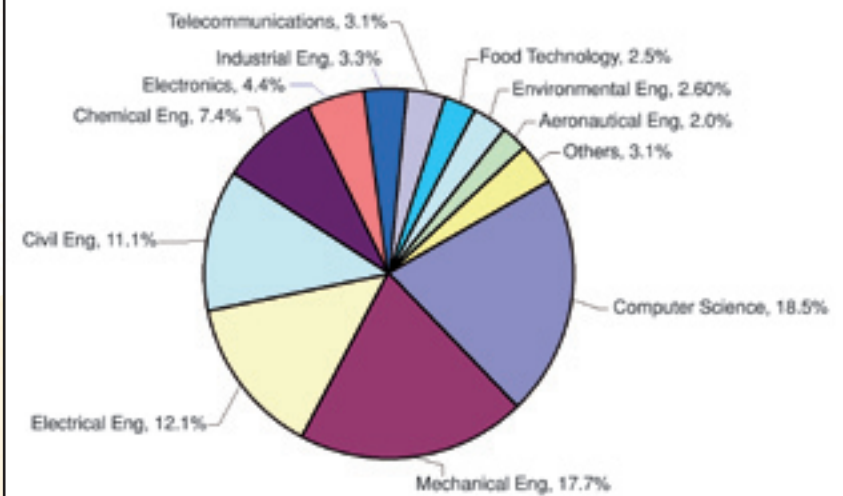

Figure 8: Major Engineering Fields

Nationality: The majority of students participating in the IAESTE exchange are citizens of IAESTE Member countries. Some are from non-Member countries and are studying abroad at Educational Institutions co-operating with IAESTE.

In 2007, 260 students with different nationalities to the sending country received places on the programme. Of these 45 were from the following non-Member countries: Albania, Algeria, Bangladesh, Benin, Bolivia, Cameroon, Dominican Republic, Indonesia, Malaysia, Mauritius, Morocco, New Zealand, Nigeria and Togo.

Five IAESTE countries exchanged students directly with the following non-Member countries: Cuba, Indonesia, Kyrgyzstan, Malaysia, Morocco, Netherlands, New Zealand, Rwanda, Singapore, Sudan and Venezuela.

Participating Employers and Educational Institutions:

In 2007 there was another decrease in the number of Employers and Academic Institutions who offered traineeships. A total of 3677 Industrial Employers and 968 Academic Institutions received students in 2007. **Figure 11**

IAESTE would like to acknowledge the continued support of all Employers and Educational Institutions in 2007.

Work experience positions on offer in 2007

The duration of the available positions can be seen in **Figures 2a and 2b**.

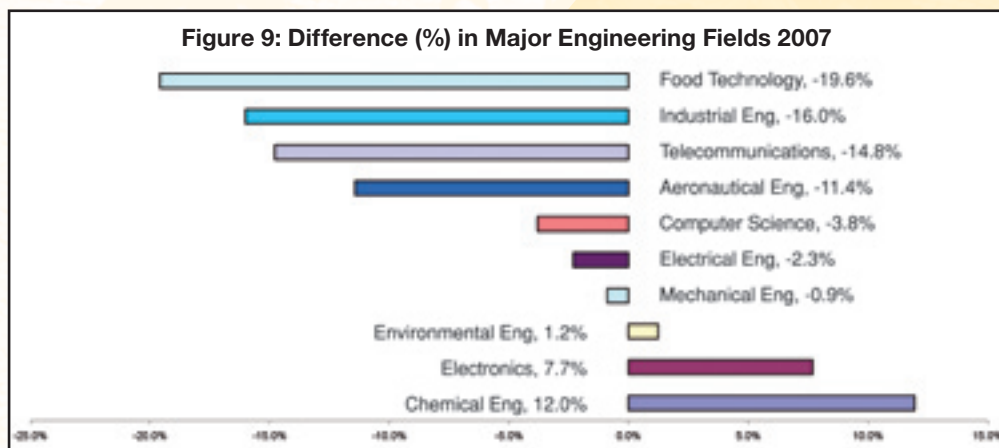

Most of the training takes place in the period June to September and coincides with the Northern Hemisphere vacation period. In the Southern Hemisphere, opportunities are available between October and April. 70 Members and Co-operating Institutions are now in a position to offer long term training opportunities while 29 offer training throughout the year.

The majority of the work placements are exchanged during the Annual Conference in January on a bilateral basis but thanks to the development of the IAESTE IntraWeb the exchange can continue after this meeting. New and unused offers can be put on the IntraWeb at any time by Members and Co operating Institutions and this ensures that IAESTE can accommodate students and employer offers as they arise.

Categories of Offers: IAESTE classify placements as Research and Development (D) indicating work of a laboratory nature; Professional (P) is used for professional activities, practical design work and similar; Working environment offers (W) indicate work in the industrial area relevant to the student's background and category (X) covers non-specific offers.

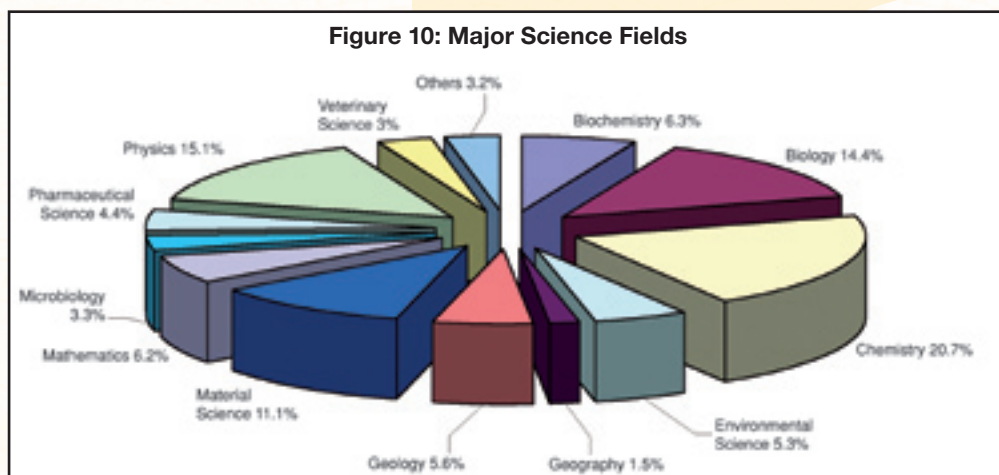

The non-specific (X) offers can be general office jobs, language offers and similar. In all cases it is the responsibility of the receiving National office making the (X) category offers to ensure that the working conditions are acceptable, beneficial to the student and in line with the standards expected of all IAESTE offers.

Figure 9: Difference (%) in Major Engineering Fields 2007

% Difference between major Engineering fields in 2006 and 2007. **Figure 9.**

Figure 10: Major Science Fields

% Major Science fields 2007. **Figure 10.**

In 2007 a total of 7434 training places were reported to be available as follows: Research and Development (D) 3208, 43.1%, Professional (P) 3662, 49.3%, Working Environment (W) 388, 5.2% and Non-specific (X) 176, 2.4%. The percentage of offers used as reported by the Members and Co-operating Institutions by category of the available offers were (D) 65.3% (P) 63.4%, (W) 56.7% and (X) 62.5%.

The bulk of the offers are in the Research and Development and Professional areas and students favour these training places that are more in line with academic requirements. In many instances such training is a required part of the curriculum. The Working Environment (W) offers are valued for higher pay and the opportunities they provide to experience working conditions in industry in other countries. In 2007 there was an increase in the number of Working Environment offers while 300 more students were placed in Professional offers.

Returned offers and cancellations

This continues to be one of the major problem areas. Despite the efforts made to date to minimise losses, the number of training places lost or unused remains unacceptably high. Based on the figures reported, the number of lost and unused training offers in 2007 amounted to 2613, 35.5% of the offers received. Employer withdrawals accounted for 14.8% and student withdrawals were 8.3%.

In 2007 individual figures show that 12 Members and Co-operating Institutions managed to maintain their total losses below 20%, which is better than last year but there is still room for improvement.

IAESTE Members and Co-operating Institutions must continue to make every effort to minimise these losses, particularly the offers that remain unused. Improvements here would result in the release of additional available places. This should

encourage all countries to seek improvements to their existing practices and to examine their communication arrangements. Accurate and timely communications should help reduce student and employer withdrawals and accurate matching of the student skills with those required by the employer would further contribute to minimising the withdrawal of offers by employers.

The year round exchange facilitated by the IAESTE IntraWeb now provides the platform for the quick and accurate exchange of jobs between Members and Co-operating Institutions for new and unused offers and also nominations for these places. This contributes to the effective use of all offers both new and unused, as they become available throughout the year.

Figure 11: Participating Employers and Educational Institutions 2003-2007

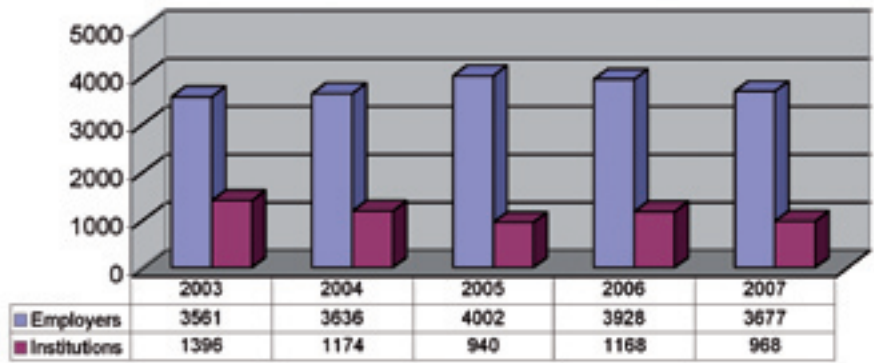

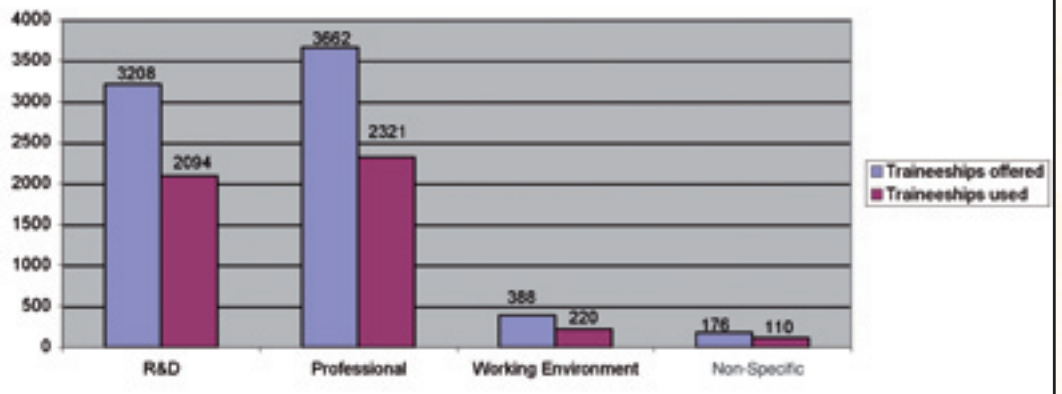

Figure 12: Categories of Offers

2007 IAESTE Day

Global Celebrations

The aim of IAESTE Day is to connect students and companies all around the world. We want to celebrate one special day, when we can slow down and in a friendly atmosphere talk to our friends, customers and business partners.

The project was initiated at the 2005 Conference in Cartagena, Colombia, and reorganised at the 2005 SID in Ljubljana, Slovenia. From then on IAESTE Day attracted the attention of more and more countries willing to make a celebration for the students and companies.

The IAESTE Day 2007 celebration was really a great success, not only because of the number of participating countries (28 in 2007 in comparison to 13 in 2006 and six in 2005). More amazing was the fact that not only the well established IAESTE countries participated but many of the newer members took the chance to present themselves on an international level. IAESTE Day affirmed its

intention: To publicise the idea of IAESTE among students, employers and others. The exchange of ideas and the use of common resources worked out amazingly well.

Maybe you now ask yourself, what form did the celebrations take? Actually they differed from country to country. While in one country they celebrated with a dinner, another country prepared sports for trainees, then others had a barbecue or just a party in a club. Networking dinners with Companies were also held as well as National Committees preparing performances by involving students and alumni. Participants could propose their own show, mainly about their internship and their host country.

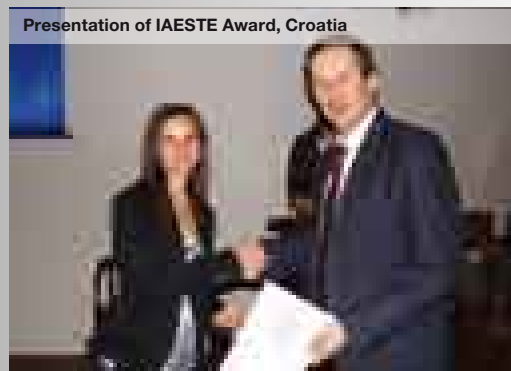

So the story continues. For this year, as it is a very special one for IAESTE, celebrating its 60th Anniversary, the goal for IAESTE Day is to have 60 participating countries. Again all activities that are somehow related to IAESTE are more than welcome. Some countries are planning to host a gala event for Companies, University representatives, trainees and of course, students. The experience of last year has created more ideas so we are already looking forward to this year's IAESTE Day which will take place on 16 October 2008, again starting in Australia and then progressing all over the world.

So don't just observe ... participate!

It is easy, effective, and a lot of fun!

REPORT:**Annual
Conference****Dead Sea Jordan
60th Anniversary Conference**

Under the royal patronage of His Majesty King Abdullah II bin al Hussein and Her Majesty Queen Rania Al Abdullah, the Opening Ceremony of the 60th Anniversary Conference of IAESTE took place in the Grand Ballroom of the Conference Hotel, the Movenpick Hotel and Resort, Dead Sea, on Saturday, 19 January 2008. Distinguished guests included diplomats as well as the Presidents and Deans of Jordanian Universities. Dr Ghaleb Sweis, the National Secretary of IAESTE Jordan, acted as Master of Ceremonies. After welcoming guests, he highlighted developments in Jordan and IAESTE Jordan over the past thirty years. He introduced the Presidential Table and invited Mr Goran Radnović, President of the Association, to address the delegates. Mrs Pauline Ferguson, the General Secretary, then presented the IAESTE medal to the Honorary Conference President, Dr Khalid al-Karaki, the President of the University of Jordan.

In her speech, the General Secretary expressed her gratitude for the royal patronage of His Majesty King Abdullah II and Her Majesty Queen Rania as well as her thanks to the University of Jordan, the National Secretary of IAESTE Jordan and all members of the Organising Committee. She also welcomed new Co-operating Institutions as well as Mr Philippe Marcangeli from FISITA, The International Federation for Automotive Engineering. She congratulated the Association on celebrating a remarkable achievement – 60 years of exchanging students throughout the world with 322,181 students benefiting from an IAESTE placement during those years.

After providing details on the history, aims and benefits of IAESTE, the General Secretary noted that IAESTE Jordan celebrated its 30th Anniversary in the Association in 2008 and was to be congratulated on this excellent achievement. Since 1978 IAESTE Jordan has sent 1434 and received 893 students.

In addition, the General Secretary remarked that it was pertinent that the nations of the world had gathered for the first time in an Arab country since the inception of IAESTE in 1948 and that there are 88 offices in 84 countries in every continent of the world today.

In his speech, Dr Al-Karaki highlighted the will and determination of the Jordanian people to create a better future. He explained that in Jordan, which can be traversed in a few hours, Jordanians can see the first reason for the success of their nation: knowledge, reason and freedom. They look around proudly to see 30 universities and 6,000 schools, all built within 60 years. He concluded his speech by thanking IAESTE for choosing Jordan and by thanking the Steering Committee in the Faculty of Engineering and Technology for their efforts in preparing for the Conference. He offered his best wishes for the success of the Conference on behalf of the Jordanian nation under the leadership of his Majesty King Abdullah II.

His Excellency Professor Omar Shdeifat, representative of His Majesty King Abdullah II and Her Majesty Queen Rania, the Minister of Education and Scientific Research, was the next speaker. He welcomed participants to Jordan and provided information on the Jordanian Higher Education system. In particular, he emphasised the accreditation system and the necessity for compliance with it. He also underlined the additional steps being made to encourage qualitative and quantitative results of scientific research and emphasised raising standards for faculty members through continuing education.

Dr Sweis concluded the ceremony by linking the comments of all speakers

The Board with former General Secretaries

with regard to the development of education and society, the IAESTE vision and the willingness of Jordanian universities to have more interaction with other universities in the world. Gifts were then exchanged to mark this momentous occasion – the 60th Anniversary of IAESTE.

During the five day Conference as well as the usual Plenary and Exchange Sessions, participants were also able to avail themselves of the IntraWeb training, provided by members of the Internet Development Team. A Meet and Greet Session organised by the Mentoring Co-ordinator, Mr Bruce Wicks, IAESTE UK, enabled newcomers to meet some more experienced delegates before the start of the Conference. The Alumni Association, FoIN, Friends of IAESTE Network, was also able to meet during the Conference, while several Workshops were organised by the SID Co-ordinator, Mr Thomas Faltner, so that everyone had an opportunity to discuss topics pertinent to the Association.

The Plenary Sessions were busy affairs and one new Full Member, Romania, was accepted by the Members bringing the total of Full Members in

the Association to 58. Several new Co-operating Institutions attended the Conference for the first time, namely Unggulan Education Foundation, Indonesia, Cuttington University, Liberia, Universiti Sains Malaysia (USM), The University of Benin, Nigeria, The Federal University of Technology, Owerri, Nigeria, POEC, The Philippines and Thai Nguyen University, Vietnam. The IAESTE Ombudsman, Professor Bernardo Herold, presented his report to the Conference and stated that he had not been too busy in 2007, which was a sign that most of the students were satisfied with what IAESTE had offered them.

A total of 7441 offers of internships were brought to the Exchange Sessions which the 82 Members and Co-operating Institutions in attendance exchanged during five sessions. An increased number of Members and Co-operating Institutions exchanged with over 40 countries.

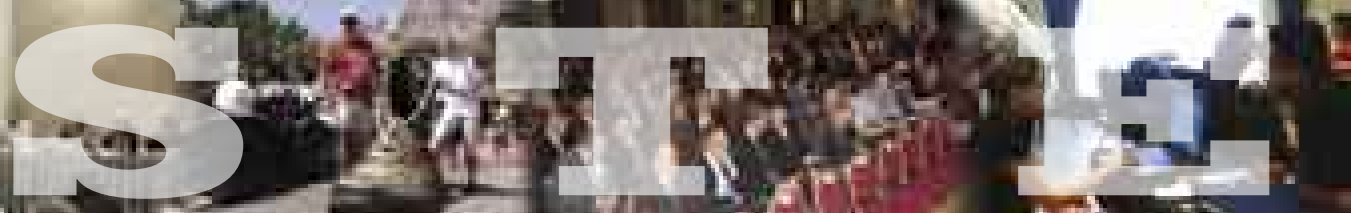

As required under the IAESTE Statutes, Mr Lucien Seywert, IAESTE Luxembourg and Mr Thomas Faltner, IAESTE Austria, retired as Members of the Board, having completed their terms of office. The Members then elected Dr Pulat Pulatov, IAESTE Tajikistan and Mr Gerhard Gevelmann, IAESTE Germany for three years and one year respectively.

During the Conference IAESTE Jordan offered delegates warm hospitality and social events. The traditional housewarming party on arrival enabled participants the chance to renew acquaintances and meet newcomers attending the Conference for the first time.

The Welcome Dinner was held in the hotel ballroom on the Saturday evening with speeches from former General Secretaries. The 60th Anniversary celebrations, which were also held in the hotel ballroom on the Sunday evening, included Anniversary greetings from all countries in their own languages. Participants also enjoyed theatre, song and dance performances by delegates from many countries and a special Anniversary song, The World in Union, was sung together by all the delegates from all countries. After a sightseeing tour on Tuesday afternoon, the International evening was held at a restaurant in Amman. In addition to the meal provided by IAESTE Jordan, national food and drink were enjoyed by everyone. At the Farewell Dinner,

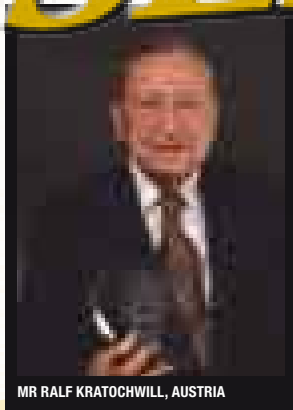

the General Secretary presented special Anniversary glass tokens to those people who over many years had made a significant contribution to the work of IAESTE. A 60th Anniversary booklet pertaining to the history of our Association from 1948-2008 was given to all participants and the evening ended with a fireworks display - a fitting end to a momentous week of exchange, memories and a lot of enjoyable but hard work by many people.

23rd Seminar on IAESTE Development

Stavanger, Norway, 17-20 April, 2008

IAESTE International convened its 23rd Seminar on IAESTE Development from 17-20 April 2008 in Stavanger, Norway.

SID serves as a means to bring together IAESTE Members and Co-operating Institutions to discuss issues of best practice, administration, organisational advancement and development of the Association. Unlike the Annual Conference, which focuses on the exchange of internships, SID brings delegates together to focus on the development and improvement of IAESTE as an international organisation. Participants form Work Groups and work on specific tasks requested by the General Conference from the previous January. The resulting work from the Work Groups is refined over the year into recommendations that go back to the IAESTE Board and then to the General Conference for official voting and implementation.

The Seminar began on the Thursday evening with a Welcome Reception which took place at the Radisson SAS Royal Hotel. Traditional Norwegian food was featured as well as a presentation of Norwegian Traditional Dances. Participants were welcomed by Carina Flaam Moen, National Secretary of IAESTE Norway and Kristine Solbjørg, the Organising Committee President.

This year, 64 delegates were in attendance from 29 countries worldwide including 23 National Secretaries. The work at SID was broken down into four Working Groups led by Work Group Co-ordinators. With only a few days available delegates worked at a very fast pace in order to produce results by the end of the Seminar which started with an opening Plenary session to inform delegates of the work which had been done since the last SID and the work to be tackled during 2008. Work Groups then presented their results at a Group Fair held on the Saturday morning. This consisted of a

Poster Session which allowed Work Groups to post their results and gather feedback from participants from other Work Groups. All Groups then presented their findings and results at the closing Plenary session where the SID Co-ordinator for 2009 and the venue for SID 2010 were nominated. A highlight of this year's SID was the participation for the first time of Company Representatives from Alstom and ABB who gave presentations on their Companies and discussed a new Global Services Project with IAESTE which will result in high quality placements for students all over the world while also raising the profile of our Association.

However, SID is not only about work. Delegates were able to spend time learning about the culture of their host country and seeing some sights. On Friday evening, participants were invited to a Gala Dinner in Sjøhusene, an historic building in Stavanger's harbour. Mr Hans Breder, one of the Founding Fathers of IAESTE in 1948 addressed participants

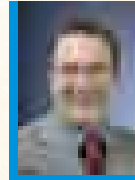

in a very inspiring speech and he invited everyone to partake of a wonderful cake which had been prepared in honour of our 60th Anniversary. On Saturday, participants were treated to a boat cruise in Stavanger Harbour and the surrounding islands. The National Evening provided everyone with an opportunity to share their own culture along with cultural dress and dances.

The 23rd SID was an overwhelming success. Participants left with a sense of satisfaction from a job well-done and a better understanding of IAESTE Norway and its culture. A special thank you to IAESTE Norway and especially to Kristine Solbjørg, the Organising Committee President, for their hard work in putting together this year's SID and the various sponsors for providing the support necessary to host such a successful event.

REPORT:

JUMP 2007

Adrian Keller
IAESTE Switzerland
JUMP Co-ordinator

IAESTE Training and Motivation Seminar

24-28 October 2007, Istanbul, Turkey

The 13th IAESTE Training and Motivation Seminar, JUMP 2007, took place in Istanbul, organised by IAESTE Turkey. 70 delegates from 18 different IAESTE countries attended the Seminar "Join Us to Motivate People". The participants were mainly new members from all over Europe and USA.

During JUMP 2007 the participants joined four out of six Training Sessions each lasting two and a half hours: The IAESTE IntraWeb & FoIN training, Company Marketing/Fundraising, Local Committee Management, Summer Reception, Membership Raising and IAESTE Forms & Job Raising. The Sessions were moderated and led by experienced IAESTE delegates: The newly obtained telephone system for the Job Raising training was used for the first time and the participants appreciated the good variety of the Training Sessions and the time given to discuss and share their knowledge.

The organising team arranged a very successful event enjoyed by all the participants. Highlights included a visit of Ortakoy, a guided tour through the construction area of the Bosphorus tunnel, a Turkish evening with traditional food and performances and the International evening took place on a boat on the Bosphorus.

The level of quality regarding the organisation, programme and education was on a par with past years. The knowledge and spirit is passed from one JUMP to the next by the Organisers, the Trainers and the JUMP Co-ordinator. The right combination of Training Sessions, excursions, cultural exchange and entertainment makes JUMP a successful event in the IAESTE calendar. Many people who have attended JUMP Seminars during the past 10 years have gone on to make a significant contribution to the work of IAESTE.

JUMP 2008 in Banja Luka, Bosnia and Herzegovina

Preparations for the next JUMP are already in full swing. The Seminar will take place in Banja Luka, Bosnia and Herzegovina, from 1-5 October 2008. The Programme will include the same Training Sessions led by a group of experienced delegates. The programme includes sightseeing in the town and area of Banja Luka, speeches, a Company visit and entertainment. All new IAESTE participants are welcome to join JUMP.

Keep on JUMPing and

"Join Us to Motivate People"!

REPORT:**Founding Members****BELGIUM**

Belgium was one of the Founding Members of IAESTE, back in 1948. The National office was based at the Comité Interuniversitaire pour l'Organisation des Stages Industriels in Brussels. Since then, IAESTE Belgium has sent more than 3000 students abroad and has received more than 2500 international students for valuable work experience in Belgium.

IAESTE Belgium saw a considerable growth in students exchanged until the seventies, but the number has decreased since then. However we are very proud that since 2003 we have been growing every year.

Belgium has not yet hosted an Annual Conference, but we are already looking forward to 2009, when we will receive our international partners at the Seminar for IAESTE Development - SID in Ghent.

In 2004, Ghent hosted JUMP, a Training and Motivational Seminar. Sixty delegates from sixteen different countries visited our medieval home city

and exchanged international experiences. The participants enjoyed a rich social programme as well. Highlights were the visit to Bruges and the motivational speeches.

With the organisation of SID in 2009 and the growing number of exchanges, IAESTE Belgium is facing new challenges. We are extremely motivated to keep on growing and to make IAESTE more known and appreciated in our country.

To end this report, I would like to wish IAESTE 'Gelukkige Verjaardag' (Happy Birthday) and many more years to come. I would also like to give the last word to one of our trainees, who experienced a six week traineeship abroad in 2006 and who captured the IAESTE spirit in this phrase: "Meeting new people every day, from all over the world, improves one's social skills and brings the world closer. Overall, going abroad for an internship with IAESTE is a terrific experience: you come home with lots of stories and you're a different person. Wow!"

Annelies Vermeir National Secretary
IAESTE Belgium

IAESTE Belgium 2008

DENMARK

When IAESTE was established, the Head of the Technical University of Denmark (DTU), Mr. Anker Engelund, decided to hand over the programme to the local student organisation, the Polyteknisk Forening (PF) which accepted it without a second thought. Apparently Mr James Newby, the first General Secretary of IAESTE, asked Anker Engelund to put a Professor in charge of the organisation, to which Engelund responded that "...if he could not trust the students from PF, he could not trust anyone at DTU...". Since then IAESTE Denmark has been operated by volunteer students from the Higher Technical Universities.

The following year, the students from PF took on the challenge of hosting the Annual Conference in Copenhagen. Since then IAESTE Denmark has hosted two more Conferences in 1971 and in 1996, as well as the first official Seminar on IAESTE Development, SID, in 1991 and JUMP, the Student Motivational Seminar, in 2006.

In 1948 IAESTE Denmark exchanged 61 placements and the maximum number raised was reached in

1991 with 212 available for foreign trainees. However, during recent years the number of placements has decreased significantly and currently we are exchanging around 70 per year.

Over the years IAESTE Denmark has become known for hosting one of the biggest events of the summer, the Copenhagen GetToGether, where more than 200 students from all over the world gathered for sightseeing and partying in and around Copenhagen but a lack of student volunteers has forced us to abandon this tradition. However we are very proud of the contribution IAESTE Denmark has made to our Association in the past sixty years.

Sinna Martinez
National Secretary
IAESTE Denmark

FINLAND

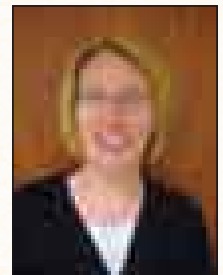

Finland was one of the Founding Members of IAESTE in 1948. The first Conference in Finland was held in Helsinki only two years later in 1950. In the same year the Finnish Government decided to set up an official Committee for trainee exchange issues. IAESTE Finland has always been administered by Civil Servants.

The second Conference in Finland was a memorable one held on board M/S Finlandia in 1973. The ship departed from Travemuende and headed towards Helsinki cruising on the Baltic Sea and on the Gulf of Finland. The cruise on a frozen sea in January was a once in a lifetime experience for many participants. IAESTE celebrated its 25th Anniversary on board.

In April 1991 Finland hosted the 3rd SID meeting in Espoo. In the same year the Centre for International Mobility CIMO was founded under the administration of the Finnish Ministry of Education. IAESTE Finland has been administered by CIMO ever since. Finland also hosted two IAESTE Nordic meetings in Helsinki in 1998 and in 2002.

During the past 60 years Finland has sent over 14,000 students abroad through IAESTE and Finnish employers have received over 12,000 students from

all over the world. Many former IAESTE trainees have built successful careers. One of them is Mr Markku Mattila who was a young engineering student in the Helsinki University of Technology when he left for IAESTE training to Germany in 1968 and to the Netherlands in 1969. Today he is the President of the Academy of Finland, a Professor and a Doctor of Science (Technology). Training abroad sparked his interest in international issues and other cultures. During his time abroad, Mr Mattila realised that the high standards of Finnish education in general and especially in the teaching of languages give a solid foundation to work and interaction in a foreign country. International issues have ever since been part of Mr Mattila's career.

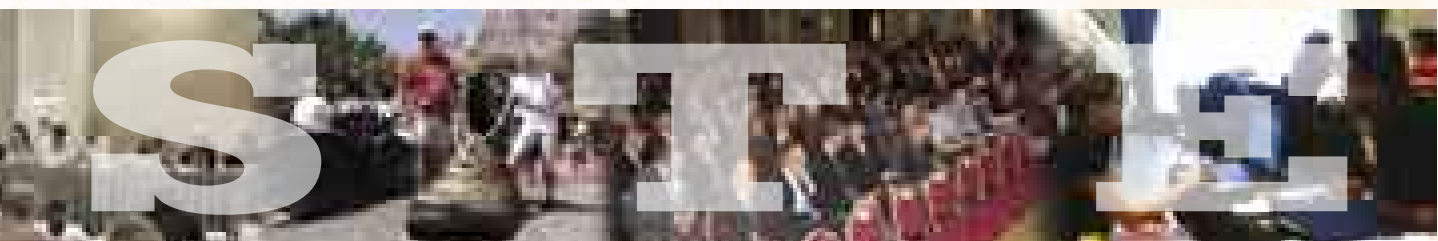

Niina Jutti
National Secretary
IAESTE Finland

IAESTE Finland 2008

Mr Markku Mattila

NORWAY

In January 1948, Hans Breder, a student representing the technical students of Norway crossed the rough North Sea by boat arriving at Newcastle and finally reached his destination at a nice student lodge in London. He made this strenuous journey to attend a meeting which turned out to be the first Annual Conference of IAESTE and he became the first National Secretary of IAESTE Norway. Since that fateful meeting in 1948 IAESTE Norway has been run by students and is today a viable Organisation represented at all the universities in Norway with approximately 110 volunteer students and one Administrative Secretary.

IAESTE Norway has been the host country of three Annual Conferences. In 1956 the 9th Annual

Conference started in Trondheim on Friday the 13th January at 13:00 hours. Despite the unfortunate choice of opening time the Conference was a success and it also hosted the first and last "Annual Skiing Competition". Trondheim was also the location for the Annual Conferences in 1980 and 2002, the last elected by the General Conference after being charmed by a video showing the city centre of Trondheim involving a child, a sled and a moose.

The 10th SID - Seminar on IAESTE Development, was hosted in Oslo in 1995 with the largest ever participation of more than 70 delegates from 33 countries. In 2008 we received as many participants at the 23rd SID in Stavanger, Norway and we met

Hans Breder again when he joined us for our 60th Anniversary celebration during the Seminar.

Carina Flaam Moen
National Secretary
IAESTE Norway

Organising Committee of the Annual Conference
in 1956 in Trondheim

Participants at the 54th Annual Conference in
Trondheim, 2002

SWEDEN

When IAESTE started in 1948 it must have been a very special moment for the men who met at Imperial College and founded the Organisation. They were only men at that time, I believe, and only one or two were students. Since then IAESTE has changed a lot, but the essence and the main ideas remain. Sweden was one of the Founding Members, however there had been exchange activities going on before 1948 through "Svenska Statens Praktiknämnd".

Since 1948 Sweden has received 27,111 students and sent out 14,796 Swedish students to countries all over the world. One of the reasons for the difference in incoming and outgoing students is that during the sixties many Swedish companies were short of labour and IAESTE was the only Organisation which was able to arrange work permits for incoming students. The students worked mainly in the workshops at Holmen Paper, ABB, Scania, Volvo and other manufacturing companies.

Some of the Swedish people that have worked with the Organisation throughout the years have played a bigger and more important role than others in developing the programme. For example Mr Rolf Beijer, who was the General Secretary during the period 1956 – 1962 and Mr Torsten Lundgren, the representative from the Swedish Employers' Confederation who was involved in IAESTE for over ten years and of course all the students especially from the Royal Institute of Technology and Chalmers University of Technology which have been actively involved since the start.

IAESTE Sweden arranged IAESTE Conferences in 1954 and 1988. The SID (Seminar on IAESTE Development) meeting in 2001 took place in Malmö and this seems also to have been a very successful meeting, even though the participants this time had the opportunity to experience Walpurgis night in Lund. Those who have been there on 30 April any year know what I am talking about.

Carola Barhammar
National Secretary
IAESTE Sweden

I myself have been working now with IAESTE for more than 20 years and I must say that these years have been very exciting but also hard work. To work with IAESTE is not just an ordinary job eight hours per day. You have to be prepared for almost anything when it comes to dealing with people, but usually these are positive things as we work with connecting students and employers. The Local Committee in Lund arranged a wonderful wedding in the cathedral of Lund for a Japanese student. This particular student came to Sweden as an IAESTE trainee and he became so fond of the cathedral that he decided to get married there. The Local Committee arranged all the necessary papers and also the wedding dinner. It was a wonderful experience - I know I was there!

IAESTE Sweden has always been supported by the government in one way or another but it is also registered as a non-profit Organisation. Over the years the National office has been located at different places such as The Swedish Employers' Confederation, The Swedish Labour Market Administration and employment office. In 1991 the IAESTE office moved to the newly started international employment office and since 1997 the office has been based in the International Programme Office for Education which is supported by the Ministry of Education and Research.

SWITZERLAND

The roots of IAESTE date back to before 1948. Between the two World Wars an Organisation was set up with the aim to offer practical experience abroad. As far as Switzerland was concerned Mr Weber, General Secretary of Brown, Boveri & Co. in Baden (now ABB) and his successor Mr Naville devoted much of their energy to this task.

Soon after the war was over the idea was taken up again. After two years of preparation, IAESTE Switzerland became one of the Founding Members of IAESTE and so began the student exchange that we are familiar with today.

At that time, IAESTE Switzerland was part of The Swiss Federal Institute of Technology (ETH). This was the perfect place for IAESTE to be located, close to the students at a prestigious school that attracted reputable Companies.

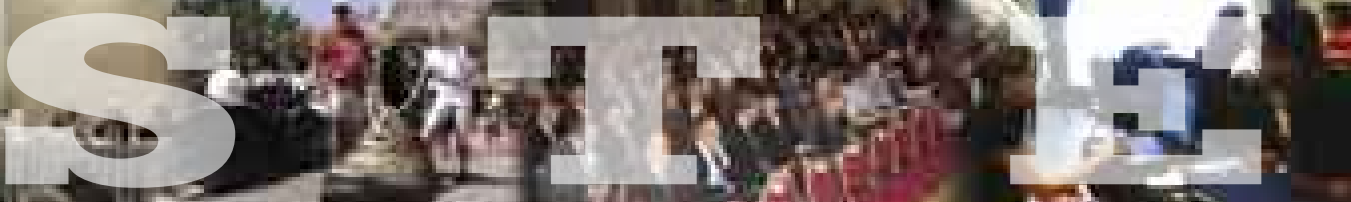

In 1953 the Conference was held in Switzerland for the first time, attended by 25 people in Zurich and chaired by the Swiss National Secretary Mr Bosshardt.

In 1964 Switzerland again had the honour of hosting the Conference, this time in the picturesque city of Lucerne. Many delegates liked it so much that they decided to come back to Switzerland just three years later. This time the Conference took place in the French part of Switzerland, in Lausanne.

One of the longest serving members of IAESTE Switzerland was Mr Karl Köchle. His contribution to IAESTE was not just on a National level but also on an International level where he was highly respected. During his IAESTE career he was Conference Chair three times and was part of the Advisory Committee for a total of eight years. From 1974 to 1980 Mr Köchle

Seraina Munton
National Secretary
IAESTE Switzerland

was the 5th General Secretary in IAESTE and was instrumental in the organisation of the fourth Swiss General Conference in Mürren in 1981.

In the 1990's former trainees took the initiative to develop IAESTE Switzerland further, on a voluntary basis. In 1995 the Local Committee in Zurich was formed, followed by Lausanne in 1996 and finally Basel in 1999. Together, the three Committees organised the annual motivation seminar, JUMP, in 2000 in Richterswil. Due to the successful organisation of the event, Adrian Keller of the Local Committee Zurich was assigned the post of JUMP Co-ordinator in 2001.

At the end of the last century ETH and IAESTE came to the agreement that IAESTE Switzerland would become an independent Organisation. Over a period of 5 years IAESTE Switzerland, under the guidance of Mirielle de Marco as National Secretary, set up structures for autonomy. Since 2005 IAESTE Switzerland has attempted to introduce innovative processes in collaboration with global Companies to improve exchange opportunities.

In 2007 IAESTE Switzerland opened an office in Lausanne in order to promote exchanges for Companies and students in the French speaking part of Switzerland.

Currently IAESTE Switzerland is busy preparing to host its fifth Annual Conference in Switzerland in 2010.

UNITED KINGDOM

The story goes that the idea of IAESTE originated around a billiards table in the Royal School of Mines at Imperial College some time back in 1947. Whether that is completely true, we can confirm that in 1948 the first Conference of IAESTE was convened in London at Imperial College under the leadership of James Newby, the Director of the College's Vacation Work Committee. At that Conference, which was attended by representatives from Institutions in 9 other European countries, the original IAESTE Association was founded and James Newby became the first General Secretary of IAESTE, serving in that role until 1956.

Since its foundation IAESTE UK has sent 22,915 students abroad and received 24,391 into the UK on traineeships. Of course nothing remains static and unchanged; in that time the programme has undergone some changes in management. In the mid 1970s IAESTE UK gained government support and funding from the Education Department and moved from Imperial College to the Central Bureau for Educational Visits and Exchanges under the National Secretary, Judy Powell. In 1992 the Department for Education for Northern Ireland agreed to fund our activity through the Central Bureau's office in Belfast.

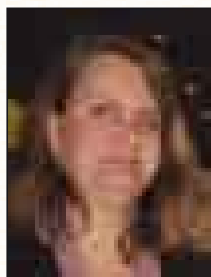

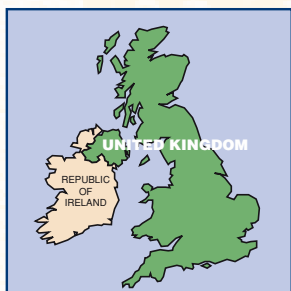

In 1993 the management of IAESTE UK was taken over by the British Council, the UK's principal Organisation for cultural diplomacy and educational exchange. The British Council is now a Founding Member of IAESTE A.s.b.l. Our latest achievement

Professor Henry Cohen, Chairman IAESTE UK, Stormont, Northern Ireland 2003

in 2007 is to secure funding from the Scottish government to support an IAESTE programme officer in our Edinburgh office and we already have over 70 placements in Scotland whereas before we had only a handful. What's more – we have our first successful Local Committee in Glasgow.

In the 60 years following that first gathering in 1948 the United Kingdom hosted three more Annual conferences, in London in 1962 and 1977 and Cardiff in 1998 where we celebrated the 50th Anniversary of the Association. IAESTE UK has provided Conference Chairs on five separate occasions and James Newby, Professor WD Wright and Judy Powell all served as Advisory Committee members. Pursuing our policy to bring our international IAESTE colleagues to different parts of the UK we also hosted two Conferences of the Seminar on IAESTE Development, in Belfast in 2002 and Glasgow in 2006. Finally we are proud to say that the current General Secretary, Pauline Ferguson, developed her passion and expertise for IAESTE while managing our programme in Northern Ireland for 14 years.

Christina Vakomies
National Secretary
IAESTE UK

Mr James Newby
First General Secretary

WELCOME TO IAESTE:

New Co-operating Institutions

INDONESIA

UNGGULAN EDUCATION FOUNDATION (UEF)

Indonesia was accepted as a new Co-operating Institution in IAESTE in 2007. UEF is an Education Foundation which supervises an international standard school, a university and an education agency.

We have had international relationships with several overseas Institutions in countries such as the United States, Singapore, Malaysia and UK for a long time. It is our mission to establish a strong student exchange programme with partner Institutions abroad. The concept offered by IAESTE is even better than simply an exchange programme. It is a paid internship programme which is very beneficial for students. That is why we are very proud to represent this prestigious Association in Indonesia.

Our first attendance at the Annual Conference in Jordan in 2008 was an exciting experience. When we arrived at the Dead Sea, we were warmly welcomed by IAESTE Jordan. The night before the opening of the Annual Conference, we had a wonderful opportunity to get to know other participants during the Housewarming Party. We were quite surprised that at that time many countries started making an appointment for the Exchange sessions and wrote it down in the appointment schedule sheet that had been prepared. We were not prepared for this, but soon we managed to get appointments as well.

During the Exchange Sessions, everybody was in a rush. Fortunately we were trained beforehand about how the situation would be and how to make use of the limited time. We managed to get 26 offers from 17 countries which was such an encouraging result for the first year.

The International Night and the 60th Anniversary Celebration were very memorable; the colourful balloons, participants dressed in their traditional costumes, excellent song and dance performances and different food. But the best of all is the sense of unity, friendship and warm hospitality among the Members and Co-operating Institutions. We are all from different countries, different cultures, different languages and different belief systems but all are united by IAESTE.

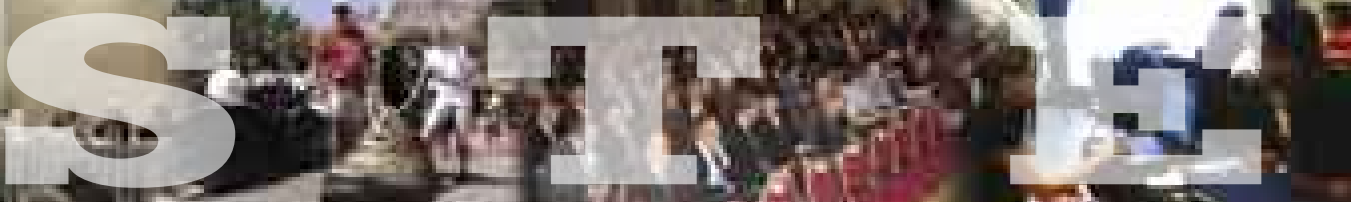

Johan Salim

REPUBLIC OF KOREA

KEIMYUNG UNIVERSITY

This year Keimyung University, Korea, as a Co-operating Institution in IAESTE, was able to gain 21 offers from Companies and Laboratories in Universities and Institutes. Attendance at the Annual Conference is most helpful and I would recommend that any inexperienced person take part in this important event in the IAESTE calendar. We joined IAESTE as a Co-operating Institution in 2007 but had little in the way of exchange. However one of the advantages of IAESTE is the IntraWeb, which allows for an all year round exchange and is a great help.

The special event for IAESTE's 60th Anniversary was very memorable. Responding to the General Secretary's requests, posters, balloons and traditional dress, "Hanbok" were pleasantly prepared and I especially practiced to sing a song, "World in Union", which all the countries sang at the end of the Birthday party to mark the occasion which was full of fun. The International

evening was also exciting with each country tasting each other's food. I served pickled vegetables, "Kimchi" which is a well known Korean food and it was very popular. Through this event, all members of IAESTE were able to get to know each other better. When it came to an end it was snowing in Amman and large flakes fell on the desert. Such a rare sight I had never seen before.

Five countries in Asia have now formed an IAESTE Asian Forum to promote student exchange between themselves and to outreach to potential members in Asia. Keimyung University has joined this Forum and we look forward to making a meaningful contribution. In 1974 Korea became a Full Member of IAESTE but due to a lack of activity lost its Membership. Now we look forward to

becoming a dynamic Member once again of this global exchange Association.

I would like to thank all those who organised a very meaningful Conference in Jordan and to thank IAESTE Tajikistan who acted as our Mentor and to all the countries who gave us warmhearted advice. We look forward to the Annual Conference 2009 in Warsaw, Poland with great anticipation.

HongSik Byun

REPUBLIC OF KOREA

GLOBAL ASSOCIATION OF TRAINING AND EXCHANGE (GATE)

This year has been a very challenging and exciting year for Korea (GATE) as we significantly raised the number of offers from Industry, National Laboratories and Universities compared to last year when we were administered by KICOS. GATE Korea has been working hard to increase the student exchange and offer better services to incoming students in the upcoming years.

On a student level, we have started to engage in more nation-wide promotion to increase awareness of IAESTE across the country. This has already resulted in a strong increase in the number

Professor Young You

of inquiries and applications we received. We have gained from the challenging experience of matching students and employers.

Due to the strong support from IAESTE students in Korea sent overseas and from our partner universities, we were able to raise about 70 offers this year and exchanged with 31 countries at the Conference in Jordan, compared with about 11 countries in 2007. Among them there are some offers which provide students with round trip airfares for an internship to Korea. We are discussing with large multinational corporations about more job offers for the summer months. About 16 leading universities have participated in our partnership this year.

As IAESTE in Korea continues to grow we need the assistance of former trainees and have successfully recruited a small number of students to form a new volunteer social committee. We now have regular social activities organised for students and a stronger support network when students arrive.

It has been a challenging year working with IAESTE for the first time and I would like to give a special thanks to the IAESTE community for making my first Conference a successful one and for all their support during the year. I would also like to thank all our Employers and Universities for their sponsorship and support.

LIBERIA

CUTTINGTON UNIVERSITY

At the Annual Conference in January 2008, which coincided with the 60th Anniversary of IAESTE, held at the Dead Sea, Jordan, Cuttington University was officially honoured and accepted as a Co-operating Institution in the IAESTE network. It was a glamorous and fantastic occasion for Cuttington University and Liberia as a whole and will be added in the history book of our University and country. For those of us who are the pioneers of IAESTE in Liberia, it will serve as a memory and will always linger in our hearts and minds of

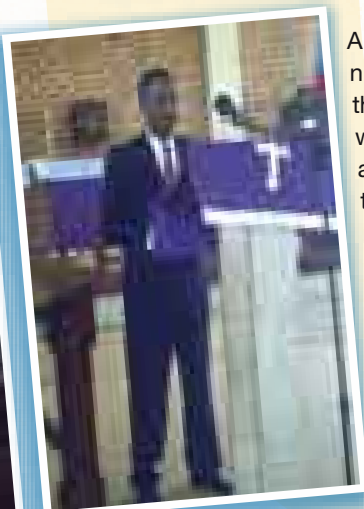

the fun, laughter, campaign for work placements, friendship and for the wonderful organisation of the whole event.

March 13, 2008, marked the official launch of IAESTE in Liberia at Cuttington University by the Hon. Rennie B. Jackson, Superintendent of Bong County, where Cuttington University is located. The Vice Presidents for Academic Affairs, Deans from Cuttington University and other Universities and dignitaries from various entities/Institutions from other parts of the country graced the occasion. To crown it all, a fantastic letter in support of our new Co-operating Institution from the General Secretary was read. The establishment of IAESTE at Cuttington University has brought unlimited opportunities for Liberian students to be involved in valuable international exchange focused on technical development.

Since January 2008, Liberian students now know that they have an opportunity to travel abroad, meet new people and obtain formal training experience. IAESTE in Liberia seeks to reach out to Companies to form a lasting partnership to assist in qualifying students all over the country to become successful professionals who can contribute to the sustainable development of their local societies and global communities as well. We at Cuttington University and Liberia are really keen on working hand in hand with IAESTE and benefiting from its experience in this area.

Although there are numerous frustrations that rear their ugly heads whenever we think about the challenges that lie ahead, we will never cease to plan for a better future. Progress is our hope, the route that will take us there is that of reason, freedom, knowledge, and justice.

Francis Jimmy

NIGERIA

THE UNIVERSITY OF BENIN

In November 2007, after the Board meeting held in Ireland, the University of Benin under the application of the National Society of Black Engineers, UNIBEN Chapter (NSBE UNIBEN) became a new Co-operating Institution in IAESTE. For the first time we were able to attend and participate in the Annual Conference at the Dead Sea, Jordan. Not only did we attend the Conference but we were also able to learn more about the structure of IAESTE and mark our first exchange with other countries.

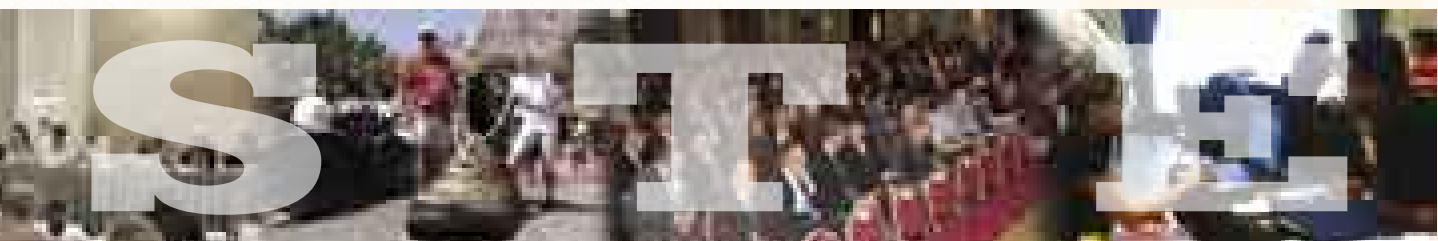

We are very proud of the opportunity that the University of Benin has been given to represent the activities of IAESTE in this region of Nigeria. This is a great challenge for us to send and receive international trainees each year. This year we have put a lot of effort into raising enough interest from other Academic Institutions and the corporate sector in our country to support the exchange.

However I would like also to thank the University of Benin, Nigeria for their fruitful financial support and interest in this programme. We hope to work closely with Employers and many more Higher Education Institutions in Nigeria. We would like to thank the Employers who offered the opportunity for our students to receive international training relevant to their studies.

We are happy to be part of the IAESTE milestone and achievement celebrating 60 years of exchanging students. Our participation in this achievement will not lapse in our mind. The most unforgettable experience for me was the amazing support that we received from IAESTE countries. Another memorable event was the Anniversary celebration and the International evening. We cannot forget the sightseeing tour to Bethany and the visit to Amman accompanied by music, language and customs.

Finally we would like to thank all IAESTE friends and particularly Germany, Sweden, Poland, Switzerland and the United Kingdom who generously offered our students the opportunity to experience an IAESTE placement in 2008. We hope to further increase the number of our exchanges with many more IAESTE countries at the next Conference in Warsaw, Poland.

Jonathan Okocha

Professor Marshall

NIGERIA

THE FEDERAL UNIVERSITY OF TECHNOLOGY,
OWERRI (FUTO)

The Federal University of Technology, Owerri has made another landmark achievement in the area of academic linkages as it takes industrial training for undergraduate students to another level by collaborating with the International Association for the Exchange of Students for Technical Experience (IAESTE).

According to the Vice-Chancellor of the Institution, Prof. C.O.E. Owuliri "IAESTE in FUTO" would provide Nigerian students with the opportunity of paid placements overseas for the purpose of gaining technical knowledge in disciplines ranging from Zoology and Chemistry, to Mechanical Engineering and Agriculture in such countries as Germany, Brazil and India to name but a few.

My attendance at the 60th Anniversary Conference in Jordan translated into the establishment of IAESTE housed in FUTO and attracted 17 international paid placements for Nigerian students.

Prof. Onwuliri encourages students to take advantage of the opportunity provided by the programme to improve their technical know-how so as to be competent, relevant and successful in this globalised world such as ours.

We in FUTO look forward to developing the programme for the benefit of our Students, Employers and Academics.

Professor Marshall A.C.A Odii

to giving opportunities to students in our country and are looking forward to developing the IAESTE programme here. We will do our best to make IAESTE in the Philippines successful.

My experience during the Annual Conference was marvellous. I enjoyed everything and will treasure the memories.

Lalaine Rotas

VIETNAM

THAI NGUYEN UNIVERSITY

As a representative of a Co-operating Institution attending the Annual Conference for the first time, I would like to say that thanks to this great opportunity we now have a deeper understanding of the important role of offering young people a good chance to develop and mature. More importantly, we have learnt that IAESTE is based on strict rules, with a well organised structure and procedures.

Furthermore, it was wonderful to meet with representatives from 82 countries in the world, which makes IAESTE a cosy family where there exists no distinction between races, religions or nationalities. At the Conference we also learnt much about the student exchange procedures of IAESTE and opportunities for our students as well as employers and have brought this knowledge back to Vietnam.

We do expect that Vietnam will make more contributions to the development of IAESTE in the years to come.

Hoang van Phu

THE PHILIPPINES

POEC, The Philippines

I was overwhelmed when I got an email from the General Secretary informing us that our Application for a new Co-operating Institution had been approved. It was late November 2007 and of course I was not expecting to attend the Annual Conference in Jordan.

I was alone at the Conference but I was so excited to learn new things, meet new people from different cultures, find out about IAESTE procedures and how we can promote the programme in our country. I observed everything and learnt from it. Thank you Indonesia, China and Germany for giving me traineeships without reciprocity. I appreciate it so much. We look forward

MALAYSIA

UNIVERSITI SAINS MALAYSIA (USM)

I would like to share the impressions of the delegation of the University Sains Malaysia (USM) at the IAESTE 60th Anniversary Conference in Jordan. The delegation included Mr. Hj. Yusoff Abdullah, Deputy Registrar of USM, and myself, from the School of Aerospace Engineering. This was not my first Conference as I had been the Chairman of a Local Committee of IAESTE Russia at the Moscow Aviation Institute in 1994 and from 1996 to 2005 I participated in Conferences as a member of the IAESTE Russia delegation. Since 2005 I have been a Professor in USM and was representing the University along with Mr. Yusoff. We were invited to meet with the IAESTE A.s.b.l. Board and after serious discussion we learned that our application for IAESTE Co-operating Institution status had been approved.

Inspired by this good news, and enjoying a sunny day, we walked along the coast of the Dead Sea. At the sea shore one can find salt stones containing salt crystals. Water in the Sea is so salty that there are no living creatures, thus providing the name of the Sea. The next morning at the Opening Ceremony of the Conference we had a nice surprise as IAESTE Jordan had invited Mr. Haji Sulaiman bin Ismail, Director of the Malaysian Student Department of the Embassy of Malaysia in Amman.

The Dead Sea

After lunch we received our first three offers at the Exchange Session from IAESTE Germany and prospects for further exchanges with other countries were discussed during the Sessions.

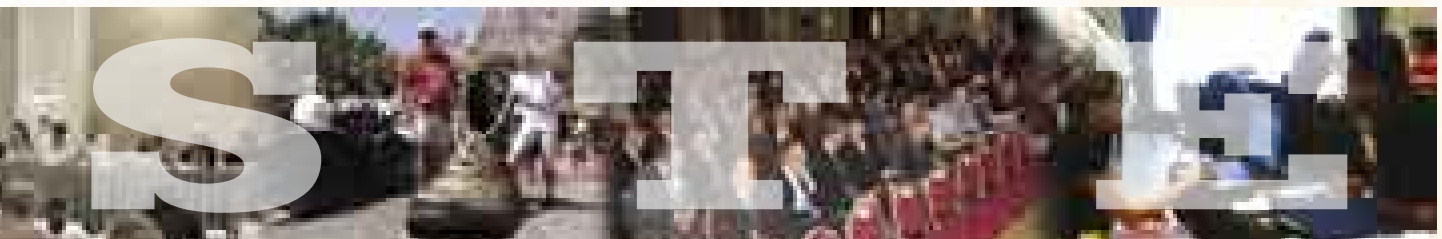

During the first Plenary Session we were presented with our Certificate confirming our Co-operating Institution Status within the Association from the General Secretary. In the evening the 60th Anniversary Celebrations were held in the Grand Ball Room. It was an unforgettable picture: national dances, songs from different countries and a large number of colourful balloons. Many people were in their national costumes.

After the Conference Closing, Mr. Haji Sulaiman bin Ismail welcomed us to his residence in Amman.

We are very much thankful to the Vice Chancellor of USM, Hon. Professor Dato' Dzulkifli Abdul Razak, the Dean of the School of Mechanical Engineering and Aerospace Engineering, Dr. Zaidi Mohd Ripin, Deputy Registrar (Academic and International Affairs) of USM, Norpisah Mat Isa, without whose support our participation at the Conference would have been impossible.

We are very much obliged to the IAESTE Board members and the Conference participants for their kind attention to the Malaysian delegation.

Professor Victor P Nesterov

Support Services to IAESTE

Internet Development Team (IDT)

The IDT, Internet Development Team, was founded in Copenhagen in 1998 by volunteers from five different countries, with the goal to deliver IT services to IAESTE. Today twelve volunteers from eight different countries are involved in IDT.

The services include anything which the organisation requests, such as web and e-mail services. The team provides overall support for the internal IAESTE IntraWeb, including the administration of servers, technical assistance for the Alumni Association, Friends of IAESTE Network, FoIN and assists with other technical issues which may arise.

The IDT maintains the public website, www.iaeste.org, which provides information on IAESTE and links to all Member countries' home pages and contact details.

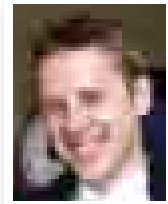

Katja Prnaver
IDT Co-ordinator

Friends of IAESTE Network (FoIN)

The International IAESTE Alumni organisation; Friends of IAESTE Network (FoIN) is now celebrating its 10th year of prosperous activity in IAESTE. Today we have more than 10,000 members in our strong network which was first organised on an international level in 1996. IAESTE has a distinguished tradition of keeping in touch with former trainees, as a result of which the Friends of IAESTE Network has successfully brought Alumni together from around the world. There is no doubt that many of our members feel a strong allegiance to IAESTE as this organisation has influenced their personal lives and careers to a great extent.

The main purpose of FoIN is to make it easy for Members and Co-operating Institutions to keep in touch with their alumni in order to support the concept of student exchange and international understanding. Members receive the FoIN Newsletter three times a year with news about FoIN activities, news from members and reports from trainees as well as IAESTE upcoming events. Members can also find former friends they have made through IAESTE with a search function in the network.

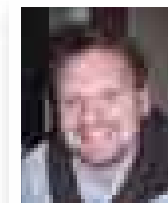

To become a member of the Friends of IAESTE Network please visit our website:
<http://www.iaeste.org/friends>

Livar Bergheim
Interim FoIN
Co-ordinator

Seminar on IAESTE Development (SID)

SID serves IAESTE by bringing together IAESTE Members and Co-operating Institutions to discuss issues of best practice, administration, organisational advancement and the development of the Organisation. Unlike the Annual Conference, which focuses on the exchange of traineeships, SID provides a structured forum for delegates to discuss ideas and actions to improve IAESTE as an International Organisation. Work Groups work on specific tasks requested by the General Conference, the IAESTE Board and the Membership at large provide the topics to be discussed at SID. In addition, a number of ongoing tasks such as Mentoring, General Conference Introductory sessions and updating of IAESTE forms and materials are tackled by SID. The results from the Work Groups are refined over the year into recommendations that go back to the Board and then to the General Conference for official voting and implementation.

Thomas Faltner
SID Co-ordinator

The IAESTE Ombudsman

The post of Ombudsman was created by a decision of the 2001 General Conference of IAESTE held in Durban, South Africa. The Ombudsman is an independent person, to whom students can report complaints about unfair treatment, with the aim of arriving at a fair settlement. The Ombudsman reports to the General Conference each year about all incidents reported to him from students. He also proposes measures to prevent similar incidents in future.

Bernardo J Herold, the former National Secretary of IAESTE Portugal, is the IAESTE Ombudsman.

For further information on the Ombudsman please go to www.iaeste.org
or contact him at ombudsman@iaeste.org

or write to: Office of the Ombudsman, P.O Box 1066
2771-901 Paço de Arcos, Portugal
